

RAU-FIPRO™

A SUPERCHARGED Window and Door Formula

From wood to aluminum, windows and doors come with a variety of options. Fiberglass and PVC are materials with proven benefits as well as limitations—but you shouldn't have to choose between them. RAU-FIPRO, REHAU's groundbreaking formulation, brings you the best of both worlds for a material that leads the way in design and capability.

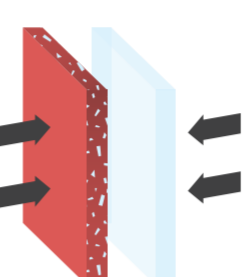

A ONE-OF-A-KIND TREATMENT

RAU-FIPRO DELIVERS A UNIQUE, INNOVATIVE WINDOW MATERIAL SOLUTION.

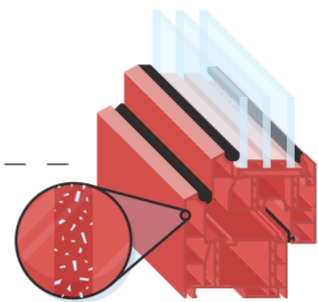

High-tech fiber-composite material

Similar to materials used in aeronautics and racing vehicles

Patented combination of fiberglass and PVC

Unique approach to material and design

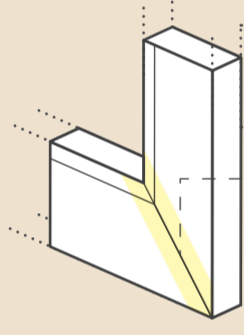

Fiberglass-infused PVC with superior structural strength

Elegant PVC surface finishing and recyclability

MATERIAL SYNERGY

Individually, fiberglass and PVC have distinct advantages—but together, they transform into a superior material without any of the downsides of either.

LONGEVITY

Fusion-welded corners

Designed for **0 leakage**

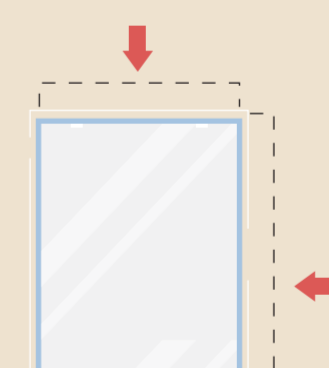

STRENGTH

2X as strong as PVC alone

Reduced need for reinforcements

Larger dimensions possible overall

COMFORT

Superior insulation

- ▶ Helps maintain indoor temperature, no matter the weather or season
- ▶ **+10%** better thermal performance than PVC windows with metal reinforcements

AT PAR WITH FIBERGLASS

Energy efficiency

- ▶ Lowers home energy bills
- ▶ Supports sustainability
- ▶ Approved for Passive House and Net Zero Projects

No matter the building, it's what they're made of that counts. So, make sure your windows and doors are the best they can be, supporting and protecting your home or business.

RAU-FIPRO INFUSES WINDOWS WITH INNOVATION, EXCELLENCE, AND ELEGANCE.
