SLIDING PATIO DOOR 2200

ELEGANT AND ENERGY EFFICIENT

Create an open, naturally lit environment in your home no matter how demanding the climate with our Sliding Patio Door 2200.

This steel-reinforced uPVC door is designed to maximize your glass-to-wall ratio while offering superior durability, sound abatement and energy efficiency.

This door is exceptional in every detail, from its high-performance uPVC material to its robust French-rail styling to its effortless glide. By combining the insulating properties of uPVC with industry-leading design, this door keeps heated and cooled air tightly sealed within your home, conserving energy and saving you money.

Whether you are replacing an existing door or building a new home, this inline sliding door design saves space while lending an elegant touch.

Special Features:

- Energy rating: U-factor down to 0.17
- Design and materials by REHAU: Premium supplier of polymer-based construction solutions
- Security: Multi-point stainless steel lock bar enhances security
- Size: Custom-built to fit your opening

Available Colors:*

-  White
-  Beige
-  Blue White

Solid Color and Wood Grain Foils available soon

* Color swatches are representative only.

- 1** 1 3/8 in. (35 mm) glazing channel accommodates triple-pane glass for superior energy efficiency
- 2** Steel-reinforced sashes provide superior structural stability
- 3** Multi-chambered design increases thermal comfort and sound abatement
- 4** Custom-engineered rollers provide long-lasting, exceptionally smooth and silent operation
- 5** Engineered drainage system achieves superior resistance to water penetration
- 6** Sloped aluminum sill resists wear while providing low-profile entry
