

Technical Sales Coordinator - District Heating

Ross-on-Wye, Herefordshire or Glasgow, Scotland (Hybrid Working)

REHAU is the premium worldwide brand for polymer-based innovations and systems in construction, automotive and industry. From furniture to windows to aircraft, you encounter our systems every day, without noticing them. While they may be invisible, their benefits are always around us. More than 20,000 employees at 170 locations worldwide apply their expertise and innovative capabilities to ensure the continuous growth of our independent privately-held company. REHAU is the place to build a career, so why not join our team and contact us today!

Your role:

Our Building Solutions team is looking for a new team member to join us in supporting the growing heating and plumbing systems needs in the market. Working as a member of our Technical Sales team on a range of heating and plumbing projects, you will participate in internal and external pipe system project tender submissions, along with providing technical support to our customers in the UK and ROI.

This is a role with a variety of responsibilities, including focused independent tasks on projects, working as part of a wider project team, from the early feasibility stages of a project to its installation, commissioning, as well as occasional technical support during installation/in operation. This will include working alongside our Sales Managers, and external parties involved in the project.

Your continuing development at REHAU will include access to a comprehensive range of internal REHAU training via different platforms, as well as external courses to support your professional growth.

This role can be based at either our Glasgow Sales Office or Ross on Wye Head Office.

Your profile:

You are a team player and a driven individual with attention to detail. You are an effective communicator with excellent organisational and time-management skills. Problem solving and practical approach would be your second nature.

You will have:

- BSc/BEng in Mechanical, Renewable Energy Engineering or equivalent (preferred but not essential);
- Experience in creating bills of materials, quotations, or tender submissions;
- Ideally previous experience in the HVAC industry in areas such as pipework, district heating or heat pumps;
- Practical experience with polymer or traditional copper/steel pipework would be an advantage;
- Experience in working with customers directly, as well as with customer relationship management systems;
- Good working knowledge of MS Office with focus on Excel, Power Point and One Drive;
- Practical experience with AutoCAD or equivalent software and the ability to produce and work with drawings;
- Completed CIBSE courses on plumbing, underfloor heating or heat networks design would be an advantage.
