SYSTEM 4500
Folding Doors

The REHAU System 4500 bi-fold door design is a premium solution for spaces that need a wide, unobstructed opening. Whether for residential or commercial applications, this unique door design allows sash panels to fold to either side, creating a wide opening without any interruption. This design can be easily matched with a variety of window and door configurations.

1. Large glazing capacity of up to 1 3/8" (35 mm) in thickness
   Improves energy efficiency and acoustical properties

2. Large reinforcement chambers in the sash
   Allow for sash sizes up to 7.5 ft (2.3 m) by 3 ft (0.9 m) wide, up to 175 lbs (80 kg)

3. Four-chambered sashes and frames
   Provide high energy efficiency

4. High-quality hardware
   Operates quietly and effortlessly

5. Lever locking mechanism
   Securely closes the end panel of the bi-folding sashes

6. Multiple locking points and compression seals all around the sash perimeter
   Provide water tightness, minimal air infiltration, security and good sound insulation
