
TECHNICAL BULLETIN TB259

SERVICE SADDLES FOR USE WITH 2 IN. MUNICIPEX PIPE

Product: MUNICIPEX PEXa Water Service Line
Date: 06 August 2018 (superseded 08 August 2017)

Service saddles allow a quick and easy way to make service connections. MUNICIPEX is compatible with service saddles from a variety of manufacturers.

The following companies have independently tested and approved their saddles for use with 2 in. MUNICIPEX water service line:

- **Romac 306-H Stainless Steel Service Saddle**
Romac Industries, Inc. – Bothell, WA
www.romacindustries.com
- **Ford FS313W Stainless Steel Saddle**
The Ford Meter Box Company, Inc. – Wabash, IN
www.fordmeterbox.com

Service saddles are not sold by REHAU nor covered by a REHAU warranty.

Only those fitting systems sold by REHAU are included in the REHAU *Sustainable Building Technology PEXa Limited Warranty*, 855.018 available at www.na.rehau.com/warranties. REHAU cannot warrant products it does not sell, even if they are connected to, used with, or associated in some way with a REHAU product.

REHAU does not continually monitor or track product changes by third-party manufacturers. Any changes may affect product performance and compatibility with REHAU products, therefore the statements made in this technical bulletin are valid only for product configurations tested by REHAU. It is ultimately the responsibility of the product specifier and installer to confirm that these products are appropriately applied, installed and tested according to the fitting manufacturer's current installation instructions.

For more information about MUNICIPEX, visit www.municipex.com or contact your local REHAU representative.
