Design Support
Benefit from our design support, our team are dedicated to ensure that you have everything you need before your installation.

REHAU can assist with:
- Design & Pipe Sizing for each project
- Heat Loss Calculations
- Bill of Materials

Service
REHAU offer a 5-day cut to length service from the UK’s largest stock.

On-site Support
We can visit you on-site and support you with training for you and your colleagues about our products and tooling.

Technical Documentation
All detailed documentation for installation and assembly will be provided for our products or you can download from www.rehau.co.uk.

5 Year Warranty
We are confident in our product solutions. We therefore offer you a 5 year product warranty on both RAUVITHERM and RAUTHERMEX.

Quality Assurance
RAUVITHERM and RAUTHERMEX comply with the insulation requirements of BS EN 15632.

UK Manufacturing
REHAU will continue to reduce our carbon emissions by an estimated 29.5% with the only UK production of pre-insulated PE-Xa pipe.

REHAU Academy
We offer training courses on all our products at our Head Office or a location of your choice to ensure you are up to date with the latest information.

REHAU Connections
All our REHAU installers are able to join our installer loyalty scheme, where you can turn your pre-insulated pipe purchases into rewards. Visit www.rehau.co.uk/connections.

Marketing Support
We offer a number of marketing support services from creating project case studies, leaflets & brochures to photography and online support with product information for your web pages and social media.

REHAU EVERLOC™ Jointing Technology

RAUVTHERM uses the renowned REHAU EVERLOC™ jointing technology. The permanent fitting has been used on all PE-Xa systems since 1987 offering:

**Reliability**
No O-Ring ensuring a leakproof joint

**Security**
Over 500 million joints installed worldwide

**Quality**
Over 25 years experience offering REHAU PE-Xa pipe + one joint + one tool concept

Low Heat Losses
RAUTHERMEX PE-Xa pipe offers excellent insulation performance through its PU foam with a lambda value of 0.0216W/mK.

90% Less Fittings
RAUTHERMEX offers significant installation savings over steel pipes, as there is no need for time-intensive welding every 6 to 12m. RAUTHERMEX coils typically use 90% less fittings than steel saving you both time and money.

Increased Insulation Options
The RAUTHERMEX Plus range features increased insulation thickness with up to 20% lower heat losses compared to RAUTHERMEX with standard insulation, ideal for large district heating schemes.

Largest Coiled Pipe on the Market
RAUTHERMEX is available in UNO (25mm – 160mm) and DUO (20mm – 75mm) and is UK stocked. The RAUTHERMEX 140mm is the largest coiled pipe on the market!

Up to 500kW Heat Loads With DUO
By using RAUTHERMEX 75mm DUO, you can transport heat loads up to 500kW at 80/50°C on district heating.

No Hot Works
The REHAU RAUTHERMEX shroud technology uses PU foam to minimise heat losses at joints and requires no hot works required on-site.

Components required

**ONLY 2**

To make a REHAU EVERLOC™ joint

RAUTHERMEX PE-Xa pipe offers excellent insulation performance through its PU foam with a lambda value of 0.0216W/mK.
