REHAU UNDERFLOOR HEATING SYSTEMS

RINGWAYS FORD, LEEDS - RAUFIX SYSTEM

REHAU underfloor heating has been installed in the new high profile Ringways Ford dealership in Leeds.

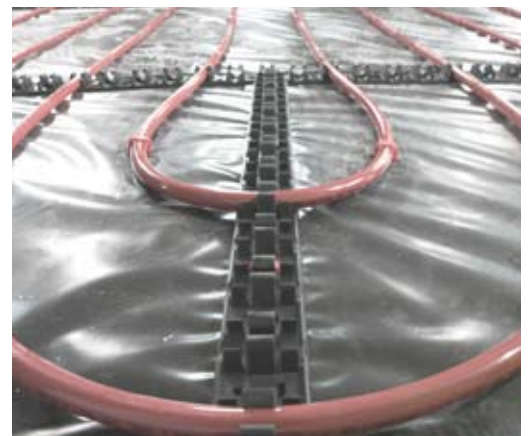

The 800m² premises features REHAU's universal PEX-a pipe laid throughout using the RAUFIX method on Kingspan TF70 25mm insulation with a fully weather compensated gas fired condensing boiler providing the heat source.

The Ringways group which owns the retail and commercial vehicle dealership selected underfloor heating in conjunction with the M&E contractors Robinsons Rocool. They wanted a heating solution which would provide warmth for the staff and customers of the new premises but which wouldn't have a negative impact on the aesthetics of the building's design.

They also wanted a system which would be cost effective to run and not waste energy heating the high empty roof space.

Robinsons Rocool recommended the REHAU underfloor heating system in particular because of its reputation for quality and its ease of installation. It was installed in conjunction with REHAU's authorised partner 3D Underfloor Heating.

Ringways is delighted with the installation and has expressed enthusiasm both for the running costs of the system and the comfort levels which are being achieved.
