INNOVATIONS CENTRE, GLASGOW

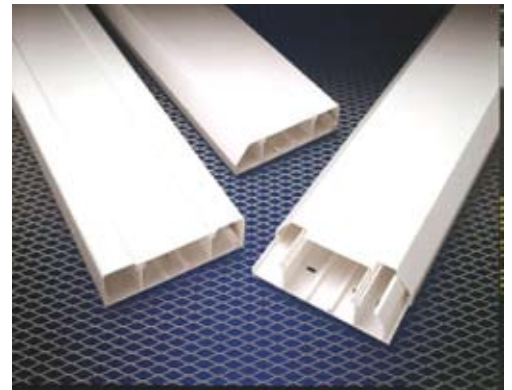

REHAU CABLE MANAGEMENT SYSTEMS

INNOVATIONS CENTRE, GLASGOW

REHAU have provided the cable management solution for a new office development in Hillington Park, Glasgow.

Built to house start-up businesses, the Innovation Centre utilises the most up to date technology. It required a cabling solution that could house the latest Category 6 cables for power, telecoms and communications, but which would compliment the high quality décor. Specified by Hawthorn Boyle Partnership, Greenock and installed by Balfour Kilpatrick of Renfrew, REHAU's PROFILA 3 provided the answer.

PROFILA 3 is a three-compartment modular perimeter system manufactured from PVC, which offers the choice of seven different profile design configurations. It's large cable capacity was ideal for the Innovation Centre installation as Category 6 cables not only carry more information faster than before, but are also physically bigger.

PROFILA 3 was able to accommodate the cabling effectively as well as the extra radius bends that are required when using Category 6 cabling.

Installation of PROFILA 3 is aided by pre-punched bases and an integral cable shelf, which keep the cables in place before the lids are fitted.

PROFILA 3 is supplied with a full range of accessories and is suitable for both retrofit and new build projects.
