# REHAU Global

## A global leader in polymer processing technologies

When Helmut Wagner founded the company in 1948 with just 2 employees, he illumined the way forward with the principles of competence, passion and innovation. Today, REHAU is an independent and family owned company that has over 20,000 employees across 50 countries. In every part of the world, the brand is redefining the interaction between our products and customers by engineering progress that enhances lives.

For the past 70 years, the ambition to enhance the lives of people around the world through innovative polymer-based solutions, along with the lessons from our predecessors, have been the driving force behind REHAU's success. Through our vigorous zeal and relentless efforts, we redefine what is possible in construction, automotive and industry, each day.

Today, insightful knowledge of the market and materials, complemented by tremendous experience in technology and manufacturing processes, allows us to cater to wide-ranging needs with customised solutions. This includes improving road safety, enhancing the aesthetic appeal of homes, reducing energy consumption in buildings, etc. As a family-run business, we think and act with a view to future generations – keeping with the principle of sustainability. By remaining focused on the growing importance of quality, efficiency and sustainability, we will continue our odyssey to make lives safer, healthier and more efficient across the world.

# REHAU India

## India footprints

REHAU commenced operations in India in 1997, by establishing a local manufacturing unit in Pune district of Maharashtra to cater for local industry market. Since then, it has established 3 plants and employed 600+ aspirants across the nation.

A German-based company dedicated to beautify and enrich homes with innovative solutions, REHAU prioritises and delivers superior solutions from product design to applications while providing great variety in terms of choices.

With more than 1000 direct customers and up to 2500 retailers, REHAU has exceeded expectations by establishing an enormous client base in India. With 4 offices and 2 experience centres spread across the country, 6 warehouses and a huge sales network, REHAU in India has become a polymer leader by rapidly capturing the market and managing its operations.

REHAU offers a choice of wide range of products which allows one to live with premium quality, thereby, raising the standard of living. These choices are versatile enough to accommodate new changes and that too with convenience. REHAU ensures that a positive difference is made through quality, innovation and choice.

**Let's live with quality!**

## Engineering progress Enhancing lives

A promise of enhanced living built upon 3 pillars:

### Trust

With synergism in effort, and trust in each member of the REHAU network, we make the impossible happen.

### Innovation

Our strength is derived from innovative ideas that improves the ordinary for extraordinary results and performance.

### Reliability

Our adherence for ethical guidelines is the foundation of our corporate conduct, because our vision is a better today and a great future, making us a reliable partner.

# Surface Solutions for Enhanced Living

## Acrylic Laminates

The premium range of Acrylic Laminates under RAUVISIO emphasise the latest trends in furniture and living space design. The versatile surface of RAUVISIO Crystal, Ace and Brilliant can be cut to size using standard woodworking tools, giving users total design freedom.

## Pre-laminated Boards

A perfect fit for an ideal ambience, the collection of Pre-laminated Boards by REHAU - RAUVISIO Crystal Décor, Crystal, Brilliant and Radiant - highlight the luxurious and elegant factor of any household or office. From high-gloss to matt, available in a wide range of colours to facilitate any interior needs.

## Flooring Solutions

RAUFLOOR Flooring Solutions by REHAU are eco-friendly, water-resistant and highly durable in nature. Idea for residential, light commercial and office applications, these are available in a wide range of colours in EIR (embossed in registered) finish.

## Solid Surface

The Solid Surface consists of non-porous artificial stones, which need minimal maintenance. This is why it is trending as a popular product for application in kitchen, bathroom, office, hotel, laboratories and medical facilities. RAUVISIO Mineral and Mono are converting ideas into reality, giving designers all the liberty to fulfil customised requirements. The Solid Surface is durable, easy to clean and has an elegant appearance with a warm touch.

# RAUVISIO Crystal Laminates

The smart glass

- 

10x more break-resistant than real glass
- 

TÜV-tested according to AMK regulations
- 

Individual cuts can be made at the building site for customised requirements
- 

Hygienic surface free from chemicals, and is food safe
- 

Quick refurbishment for instant use
- 

Can be processed with conventional wood working tools
- 

High scratch resistance due to its hard coat finish
- 

Extremely resistant to deformation even with applied force
- 

No finger marks on matt surfaces
- 

Can be written on with a whiteboard marker (high-gloss) or chalk (matt) and cleaned without leaving any residue
- 

Easy cleaning due to nanotechnology
- 

50% lighter than real glass

Application Type: Vertical

# RAUVISIO Crystal Laminates

The most flexible glass of all times

Glass lends a sense of elegance and luxury to kitchens, bathrooms and living rooms. An innovative surface material, RAUVISIO Crystal fully lives up to this trend and offers maximum design flexibility. RAUVISIO Crystal is a polymer glass that offers a high-quality glass finish while completely eliminating the disadvantages of real glass. Looking just as beautiful as real glass, RAUVISIO Crystal is 10x break-proof, scratch-resistant, 50% lighter than real glass and also offers excellent processing flexibility.

Available  
in high-gloss  
and  
super matt

## Product Range

### Individual components

#### Glass laminate and balancing sheet

High-gloss & matt

The glass laminate and balancing sheet, each 2mm, is perfectly colour-coordinated and ensure a distortion-free pressed board.

#### Dimensions

High gloss laminates	2440 x 1220 x 2mm
Matt	2440 x 1220 x 2mm
Balancing sheet	2440 x 1220 x 2mm

#### Edgeband collection

High-gloss & matt

For RAUVISIO Crystal, we offer perfectly coordinated edgeband designs.

### Product Advantages

#### Easy processing

Whether it's customisation, dimensionally accurate pre-cuts or holes for handles and fittings - you can easily process RAUVISIO Crystal using pre-existing wood working tools, without the risk of breaking it or producing any rejects. Even bends and free-form parts can be created without problems.

#### Grooves and inlays

Thanks to grooves and inlays, RAUVISIO Crystal offers even more design flexibility.

## Product Advantages

#### Back lighting

The rear grooves are ideal for back lighting using conventional lights. This will allow you to add even more highlights.

#### Break and scratch-resistant

RAUVISIO Crystal is break-resistant and is therefore suitable for large-scale industrial production. Its shock and break resistance result in 20% fewer rejects. The material is also as scratch-resistant as real glass and therefore highly desirable - even for end customers.

#### Easy to write and erase

On glossy RAUVISIO Crystal laminates, it is possible to write with conventional board markers, which can be easily erased without leaving any residues. Chalks can be used on matt surfaces.

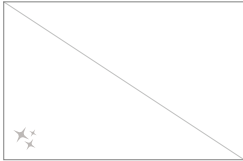

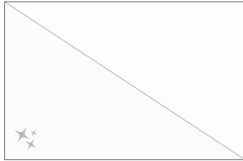

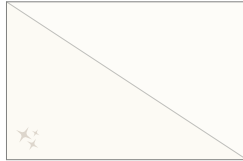

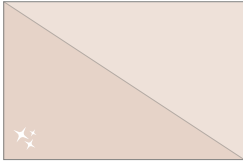

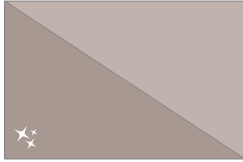

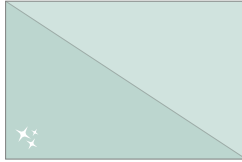

#### Easy to clean

The non-porous surface is sealed with a hard coat finish, and can therefore be cleaned without problems. RAUVISIO Crystal is also suitable for use in rooms with the highest hygiene requirements.

# RAUVISIO Brilliant Laminates

Seamless acrylic surface

- 

High scratch resistance due to its hard coat finish
- 

Easy cleaning thanks to nanotechnology
- 

TÜV-tested according to AMK regulations
- 

Totally seamless appearance and therefore an inexpensive alternative to real lacquered fronts
- 

Up to 60% lower production costs compared to lacquered components
- 

Colour and UV- stable

Application Type: Vertical

# RAUVISIO Brilliant Laminates

Acrylic surfaces for interior designing

RAUVISIO Brilliant represents our latest generation of high-gloss laminates. Thanks to its vibrant depth effect, it can replace high-quality painted elements. The high-gloss laminates consist of a PMMA and ABS layer and guarantee a high-tensioning force with a positive effect on surface stability after processing. RAUVISIO Brilliant exhibits excellent lightfastness and UV resistance. There is no colour fading, regardless of natural or artificial exposure to light when used for interior applications.

The balancing sheet developed in-house is perfectly colour-coordinated to RAUVISIO Brilliant and has sufficient freedom from distortion for the pressed board.

Now available in 1mm thickness

Product Advantages

Sawing and drilling

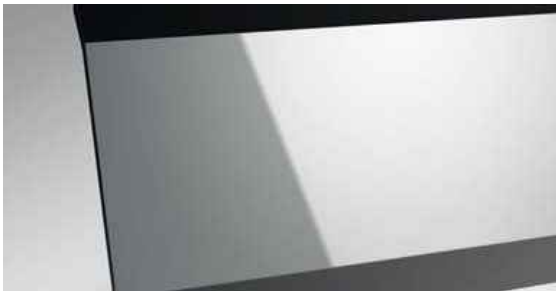

RAUVISIO Brilliant can also be processed with conventional wood working tools to make – individual, dimensionally accurate pre-cuts, holes for handles or fittings.

High gloss on the milling radius

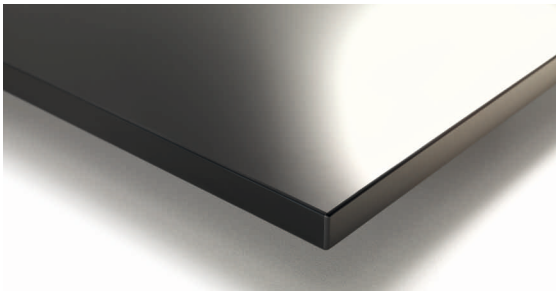

Combined with polymer zero-joint edgeband and new processing technologies, conventional frame effect disappears completely with RAUVISIO Brilliant. The result is a perfect, all-round gloss on the entire work-piece.

Product Range  
Individual components

Bending and folding

RAUVISIO Brilliant is ideal for simple bending and folding. It can be shaped into nearly any form and thus provides a lot of design freedom for sophisticated furniture designs.

UV resistance

RAUVISIO Brilliant has excellent lightfastness and UV resistance. So there are no colour variations between different light and sun exposures in interior applications.

Acrylic laminate, balancing sheet and edgeband collection

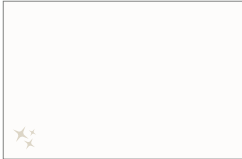

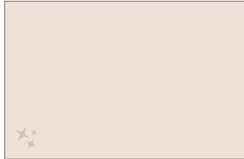

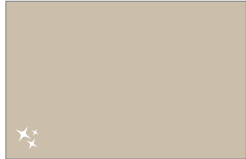

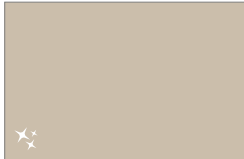

Brilliant: high-gloss

Acrylic laminate and balancing sheet are perfectly colour-coordinated and ensure a distortion-free pressed board.

We offer perfectly matched edgeband designs with RAUKANTEX.

RAUVISIO Brilliant SR Pre-laminated Board

Scratch-resistant and seamless acrylic finish

Customisation in interior designs is in trend. Whether you want a high gloss depth effect or matt elegance, RAUVISIO Brilliant SR will help you get an exclusive surface with an ultra-durable hard coat finish. The material has a captivating lacquer with exceptional resistance to scratches and chemicals.

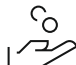

Multitude of Variants  
RAUVISIO Brilliant SR Board with matt and high-gloss

Engineered with innovative German Technology, RAUVISIO Brilliant Pre-laminated Boards cater to diverse industry requirements. It is easy to clean and maintain its regular look. Its seamless finish can replace even high-quality painted elements; the contemporary features make it the right solution for every ambience.

- 

High scratch resistance due to its hard coat finish
- 

Totally seamless appearance and therefore an inexpensive alternative to real lacquered fronts
- 

Soft-to-touch super matt finish
- 

Up to 60% lower production costs compared to lacquered components
- 

Easy cleaning thanks to nanotechnology
- 

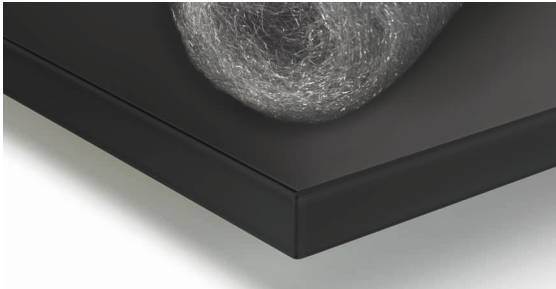

Hygienic & Safe
- 

Can be written on with a whiteboard marker (high-gloss) or chalk (matt) and cleaned without leaving any residue
- 

Colour and UV- stable
- 

Can be processed with conventional wood working tools

Product advantages and technical specifications

High scratch-resistance

Lacquer equips RAUVISIO Brilliant SR to resist scratches making it suitable for requisite applications.

Technical features

- Tested according to DIN 68861/T4
- Scratch-resistant - 4B
- Same colour balancing sheet, symmetric in order to prevent deformation
- Gloss level of <6, measured in conformity with AMK-MB-009 (09/2010)

- Tested for resistance under temperature gradient
- 1 hour 50 ° C
  - 1 hour 60 ° C
  - 4 hour 75 ° C
- {Assessed according to AMK-MB-001 (05/03)}

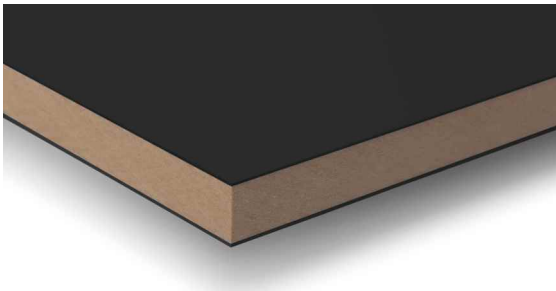

Easy cleaning

The non-porous surface is sealed with a hard-coat finish, making it easy to clean. RAUVISIO Brilliant SR is also suitable for use in rooms with the highest hygiene requirements.

- Tested for resistance under moisture gradient
- 14 day permanent storage
  - 85 ± 5% rel. air humidity
  - 40 ± 2 ° C test temperature
- {Assessed according to AMK-MB-005 (07/2007), module2}

# RAUFLOOR Neostein

Rigid core vinyl tile

RAUFLOOR Neostein is an epitome of REHAU's innovation. The plank comprises of Stone Plastic Composite (SPC) and is characterised by five special layers: UV layer, wear layer, colour film/printed layer/ vinyl top coat, an SPC core and a foam or cork backing layer. The top most UV layer protects the surface from most scratches, dirt, chemical contaminants and offers resistance to abrasion. The wear layer gives it durability, stain and scratch resistance which helps in easy cleaning, while the printed layer provides the desired pattern to the surface. The ultra-dense SPC core makes it water proof and durable and the foam or cork backing helps in the installation process by smoothing out minor imperfections in the subfloor.

# RAUVOLET Vetro Line 2.0

Premium glass roller shutter system

Word's first 'plug and play' glass roller shutter system

RAUVOLET Vetro Line 2.0 offers a unique way of bringing together two previously incompatible solutions - simple installation with convenient functional characteristics of tried and tested RAUVOLET cassette system, and the design features of genuine glass. This ready-to-install cassette module just needs to be screwed into the cabinet.

## Advantages

Space saving up to 30% compared to regular swing doors - the roller shutter can be left open at any desired height for convenient 100% access.

The excellent gliding properties offer smooth and quiet opening and closure of the cabinet. The roller shutter is designed to withstand heat, steam and water in the kitchen. While steam and water can cause regular swing doors to swell and eventually show cracks and bulges, RAUVOLET stays as new for years.

# RAUVOLET Crystal Line 2.0

Smart glass in a tambour door

Whether you desire ample storage space or a much more modern look for your interiors, RAUVOLET Crystal Line 2.0 offers you the best of both worlds. With the sophisticated look and design of glass as well as the improved strength, better scratch resistance and lighter weight of a polymer, it is expertly crafted to suit the modern interior designs, be it for kitchen, living room or a shop fit-out.

## Advantages

- Sophisticated look and design of glass
- Improved strength, better scratch resistance and light in weight
- Based on Vetro Line 2.0 mechanism.

# RAUVOLET Metallic Line Frame 4

Delicate roller shutter system for stirring appearance

RAUVOLET Metallic Line Frame 4 offers a unique way of bringing together two previously incompatible solutions - simple installation with convenient functional characteristics of tried and tested RAUVOLET cassette system, and the design features of genuine glass. This ready-to-install cassette module just needs to be screwed into the cabinet.

RAUVOLET Metallic Line tambour door system makes exclusivity possible.

- High-quality, exclusive look
- High operating comfort
- Light, smooth running
- Pleasant feel

## Advantages

- The new subtle design of the track system made from solid aluminium highlights the exclusive appearance of the RAUVOLET Metallic Line effectively - for the first time.
- Easy to install due to convenient cassette solution.
- Delicate track system and reduced accessories creates a sleek design.
- Combination of exclusive aluminium or stainless steel (SS) surfaces with the convenient, functional properties of polymer tambour door systems.

**Colours available**  
Real aluminium finish (230 L) SS finish available

**Dimensions**

 Various sizes available in 12 to 55mm width and 0.4 to 3.0mm thickness

## RAUKANTEX Colour

Always the right tone

The desires and requirements of customers are getting progressively personalised. Therefore, professional colour management is required to meet these standards. With RAUKANTEX Colour, you can always strike the right tone.

## RAUKANTEX Décor

Unlimited Variety

With RAUKANTEX Décor, there are no limits to your imagination, owing to our wide range: fine woods, multiplex effects, artful design combinations, brilliant stone designs, and trendy metallic prints  
RAUKANTEX Colour and Décor can be easily matched to Indian or global surface and board collections. REHAU India offers 1400+ colours and décors with different embossings, which makes us the leading design competence supplier in the market. With REHAU, you can be sure that we will always offer the right design to match your requirements!

**1400+** edgeband designs\*\*

**300** active, continuously available edgeband designs

**200** new additions annually

**More than 20,00,000 edgeband options**

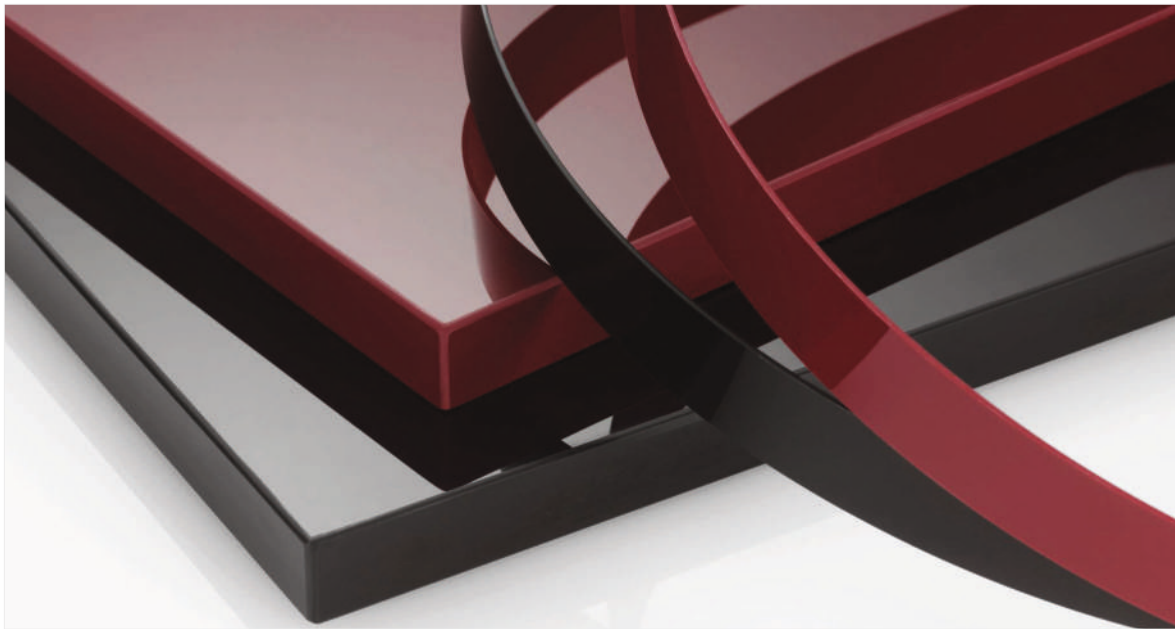

are possible through the combination of materials, dimensions, embossing, gloss level and application methods

\*\*Indian range

# RAUKANTEX Mirror Gloss

The ultimate in gloss edgebands

The high demand for high-gloss surfaces in upmarket interior designs for office and living space is set to continue. When creating high-gloss surfaces, it doesn't come down to gloss level alone; the high-gloss finish is influenced considerably by the neutrality in the surface. The eye perceives a mirror effect only when both these factors resonate. Striking the perfect balance between the twin factors is the secret behind the success of the RAUKANTEX mirror gloss edgebands. Having a lacquer application with over 85 gloss level points and unique smoothness of the ABS surface, RAUKANTEX Mirror Gloss sets the highest standards

Material	ABS (without embossing)
Lacquer type	Mirror gloss
Size	23 x 1mm

Features

- The ultimate in gloss edgeband
- A gloss level of over 85 points and a pure, reflective quality, sets new standards for mirror surface effect
- Delivery with protective foil
- Goes mainly with Formica, Senosan
- Now includes the dimensions 45 x 1.3mm for wide-horizontal applications in kitchen and bistro
- Fresh colours and striking decorative designs are the newest additions to our collection

# RAUKANTEX Magic 3D

The fascination of metal

REHAU can now add two distinctly different gloss finishes to one decorative design. By using two different lacquer types, we have successfully managed to produce unique effects creating a 3D illusion. Ingenuity of the new brushed titanium, foamed metal and rain decorative designs convince even the most discerning critics. The processing properties, however, have remained the same for all of the innovations: good radius compatibility, a finish that requires no reworking, radii that can be polished, and decorative designs that remain intact even when the radius is milled. These are matched to popular boards/laminates.

RAUKANTEX Magic 3D

72236 - Aluminium (Art. no. 309509-002)

Material	PMMA (Polymethyl methacrylate) with new decoration process	Material	PP (Polypropylene) with real aluminum or steel surface
Embossing	Smooth/223	Embossing	Smooth/223
Lacquer type	Standard lacquer	Lacquer type	Standard lacquer
Size	23mm x 1.00mm	Size	23mm x 1.00mm

Advantages

- Zero-hour adjustment time - no special adjustment required on machine parameters
- New perspectives in the creative edge design along with RAUVOLVET Roller Shutter
- Various combination of colours/décor and two different finishing on surface are possible
- Combinational design, metal foil and processing advantage of polymers
- Economical alternative for compact aluminum edge applications. There is no need for special adjustment on machine parameters

# RAUKANTEX V-Groove

Glass and metal unite

REHAU's V-groove has a split design feature allowing high gloss and matt finish to be incorporated within one edgeband. By ensuring that the top section of the edgeband has an exact lacquer match to the surface being edged, the impression created is that the surface and the top section of the edgeband is all made from one piece, with the lower section of the edgeband having a contrasting matt finish. By cleverly incorporating two different levels of lacquers within one edgeband, the overall impression of a moulded surface is achieved, suggesting a surface created out of the same parent material. For worktops and counter applications, the new dimension in 45 x 1.3mm offers the perfect solution. The new super high gloss design is ideally matched to the glossy surfaces of board manufacturers. This creates the appearance of being one piece. Furthermore, there is of course the combination of glass and metal in order to create a stacked effect. Whilst the top of the edgeband is glass-coloured, the lower area is finished e.g., with a stainless steel or aluminium look.

Material	PMMA (Poly Methylmetha Acrylate)
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23mm x 1.00mm

# RAUKANTEX Super High Gloss

The impressive gloss

The world of high-gloss boards/laminates and the spectrum of corresponding gloss levels are vast. Based on the customer requirement and area of application, you can create a perfect surface with optimum gloss level. REHAU recognises these differences and, in response, also offers super-high-gloss finish, matched to corresponding boards and laminates in addition to the high-end mirror gloss surface.

Material	PVC and ABS
Lacquer type	Super high gloss lacquer
Size	23 x 1.30mm and 25 x 1.30mm

## Advantages

- New super high gloss finish with gloss level of over 85 points with smooth and reflective surface.
- Designed for use in regular edgeband machine without the need for special settings.
- Comes with protective film to prevent scratches during processing or transportation.

# RAUKANTEX Wood Veneer

Mesmerising wooden patterns

Wood has many varieties: walnut, maple, beech, ash, etc., each corresponding to a particular shade. This range in the natural variety of wood is also available in RAUKANTEX Wood Veneer edgebands.

During production, the veneers are sorted according to growth characteristics and appearance, so that within each batch the master rolls produced are of uniform colour. With its wide variety of wood types and thicknesses, the RAUKANTEX Wood Veneer edgeband range can provide a suitable match for every application.

Material	Wood veneer
Size	Thickness 0.60mm and 1.00mm
	Width 24mm, 35mm, 45mm and 55mm

## Advantages

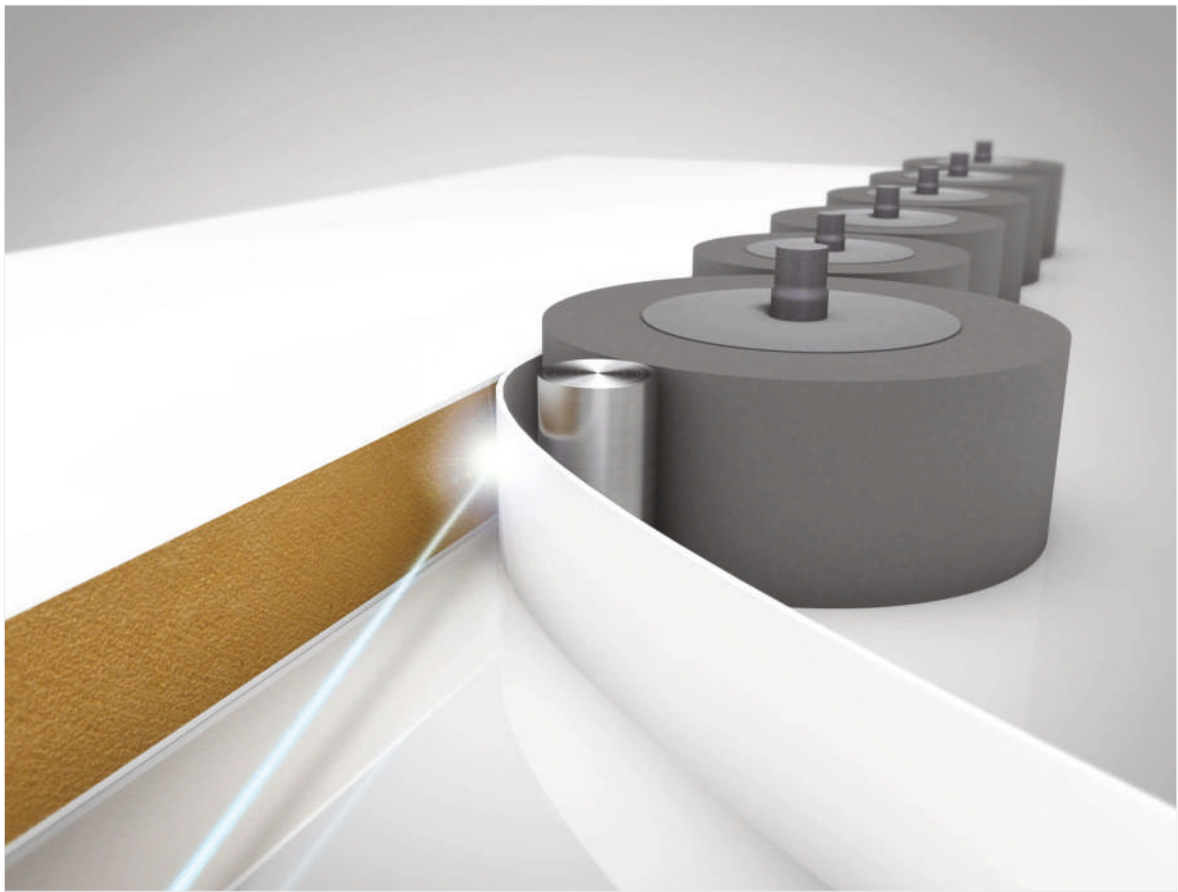

- Real wood veneer collection
- European wooden pattern
- Multi-layered with adhesive-coated sides
- Asymmetrical and finger joints

 Oak	 Maple	 Ash
 Teak	 American Walnut	

# REHAU Zero-joint Edgeband

Elevate your design with zero-seams and zero glue

Zero-joint Edgeband is a revolutionary product from REHAU to help you achieve a seamless finish with no framing effect. The pre-applied, co-extruded polymer functional layer replaces the traditional glue, allowing for a much superior and seamless joint between the edgeband and the board.

## Advantages

- Achieve visually beautiful monolithic panel look
- Best moisture resistance, heat resistance and performance over time
- Seamless joint and a higher quality seal
- Creates a bond equal to or greater than PUR (no delamination)
- Higher quality edging allows you to promote a higher-end finished product at a premium
- No hotmelt or down-line cleaning of excess adhesive from finished panels

# Sustainability

While our quest is to achieve a seamless joint and superior finish with Zero-joint edgebanding, the ecology and conservation of resources are important for REHAU too. Thus, we are able to reduce the need for adhesives and cleaning agents during the procedure. We also use **ABS material** that is **ecological in nature** and **harmless to the health** of humans.

 Seamless joint

 Heat-resistant

 Better moisture-resistant

 No glue

 Environment Friendly

 Highly Durable

# RAUCARP

Affordable. Durable. Fashionable

RAUCARP edgebands is a quality range to protect the furniture from physical damages while enhancing its overall appearance. It can be applied manually on the edges of furniture. Moreover, it is a highly economical choice when it comes to wooden binding and replacement of melamine.

Available in 100+ shades

Material	PVC	Size	22 x 0.45mm   22 x 0.8mm
Lacquer type	Matt & High Gloss	Roll Size	50mt

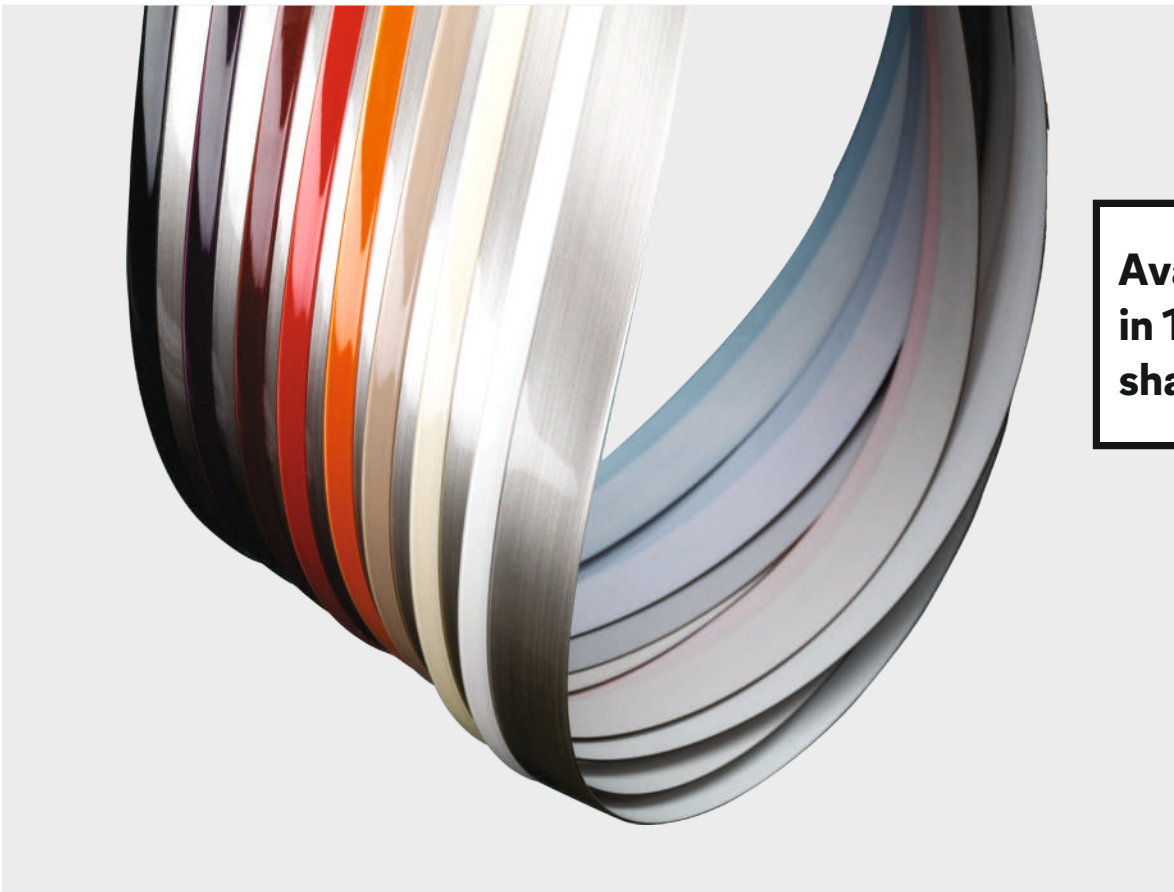

- Aesthetic
- Economical
- Durable
- User friendly

\*Other sizes available on demands

# V-Twin

Dual tone to edgeband

A particular highlight within the V-Twin is the stepped edgeband with a groove. Whilst the upper section of the edgeband is available in typical glass colours, the lower section features aluminium. When combined with a surface of the same shade, this gives an appearance of a real glass-like top surface.

Available in 10 shades

Material	ABS	Size	23 x 1.00mm
Lacquer type	Super lacquer		

## Advantages

- Combination of the design aspect of glass with the processing advantages of polymers
- Special surface protection - 100% resistant to typical accidental scratches
- Various combination of colours/décor and two different finishes on surface is possible
- Zero-hour adjustment time - no special adjustment required on machine parameters
- New perspectives in the creative edge design along with RAUVOLVET roller shutter

# RAUBOND Adhesives

# RAUBOND Adhesives

## Water-based adhesives for Retail

RAUBOND presents a range of water-based adhesives, comprising Champ, PolyMaster and Rapid-X. These adhesives are suited for various applications. Being a multi-purpose adhesive, RAUBOND Champ is perfect for manual pressing and laminating applications, including hot press and cold press. RAUBOND PolyMaster is ideally used for PVC edgebanding, along with pasting plywood to acrylic sheets, PVC sheets and charcoal sheets. With its fast setting application, RAUBOND Rapid-X is used in marine ply, marine laminate, finger jointing and laminating applications (hot press, cold press and roller press).

Packs available in (kg) : 1/2, 1, 2, 5 and 50

### Applications

- PVC edgebanding
- Plywood to acrylic, PVC and charcoal sheets
- Wood to wood adhesive
- HPL to plywood
- Finger jointing
- Critical wood applications

Strong bonding

Water-resistant

Heat-resistant

Quick setting

Maximum spreadability

Durable

### Water-based adhesives for OEM

RAUBOND also offers a range of water-based adhesives exclusively for OEMs: WudTite, WudTite Pro and Swift.

RAUBOND WudTite is a multipurpose adhesive that instantly bonds with surfaces.

RAUBOND Swift is a waterproof adhesive prepared with a termite resistant formula, ideal for applications requiring fast setting.

RAUBOND WudTite Pro is crafted with an anti-bubble formulation which makes it perfect for critical wood applications and vertical pasting.

Excellent strength

High coverage

Critical carpentry

Waterproof

Termite resistant

Packs available in 50kg

# RAUBOND Adhesives

## Hotmelt adhesives

RAUBOND offers a range of hotmelt adhesives recommended for use with manual and through-feed machines over a temperature of 120-200°C. Additionally, low temperature adhesive is also available for processing thin edgebands.

### RAUBOND hotmelt variants

- Techpro Clear 6768
- Techpro 545/15
- Techpro 545/05
- Techplus 580/15
- Techfix 544/15
- Techmanual Clear6765
- Techmanual 6722/15
- Techmanual 6723/15

### Features

- Grades available for through-feed, semi-automatic and manual edgebanding machines
- Excellent melting properties
- Excellent adhesion for bonding PVC, wood veneer, PP and ABS
- No stringing
- European quality
- High thermal resistance
- Medium viscosity
- High green strength

### Applications

To be used in manual and automatic bending machines for strong adhesion between the substrate and:

- Veneer
- Resinated paper edges
- PVC
- Polyester
- ABS
- Melamine resin edges and heart-wood

Shelf life: 2 years, in a properly closed package; to be stored in a cool and dry place.

# Wood Working Accessories

## Masking tape

## REHAU Masking Tape

Superior quality adhesion

### General purpose masking tape

The robust tape for everyday jobs, REHAU Masking Tape can be used on almost all surfaces and gets removed easily without leaving any residue. It can be used at all workplaces and job sites. REHAU Masking Tape is a cost-effective and pressure-sensitive product that holds and seals perfectly, providing superior quality adhesion for 14 hours.

#### Features

- Wide range of applications
- Masking, splicing, bundling and packaging
- Conforms to all surfaces
- No residue transfer on removal

#### Sizes available

Width	18mm and 24mm
Length	20m and 40m

### Possible application areas:

Furniture

Hardware

Paints

Automotive

## **RAUCORD Weaving Materials**

The new generation weaving material

# RAUCORD

The new generation weaving material

If you love the luxurious appeal of wicker furniture but dread its upkeep, RAUCORD has come to your rescue. RAUCORD is a collection of high quality premium synthetic weaving material. With its superior characteristics and cutting-edge technology, RAUCORD offers you a relaxed and carefree experience both indoors and out.

-

# RAUSHELL Bravura

## External Wall Cladding

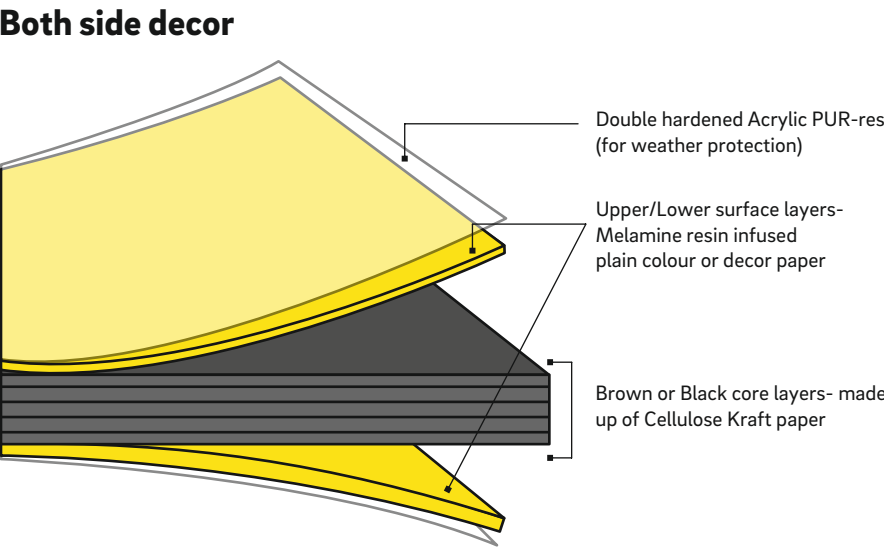

-  UV Resistant
-  Termite Resistant
-  Impact Resistant
-  Wear & Abrasion Resistant
-  Weather Resistant
-  Low Maintenance
-  High Durability
-  Good Chemical Resistant
-  Fire Ritardant
-  Scratch Resistant

REHAU India has come up with yet another remarkable product in the market – RAUSHELL Bravura. These facade panels are considered to be an innovative solution for all types of construction needs. RAUSHELL Bravura is a HPL compact laminate with an intrinsic surface, manufactured using conventional PMMA based UV film or hot coating technology.

It's made with a blend of cellulose fibres and thermosetting resins, under high pressure and temperature. Available in a wide range of colours, RAUSHELL Bravura is the perfect external cladding solution that can conveniently be used in combination with other materials.

- HPL Compact:**
- Exterior Decorative Panels are manufactured by: Impregnating large amount of Kraft papers having resin-absorbing capability
  - Pressing under high temperature of 180 °C -220 °C and pressure of 120 kg/ cm<sup>2</sup>

- Application areas:**
-  Commercial
-  Hotel and Resort
-  Residence
-  Shopping Mall
-  Retails Shop
-  Corporate Office

**Available Size:**  
2440mm x 1220mm x 6mm

# Hardware

## Engineered for a purpose

The UK owned Titus Group develops, manufactures and markets innovative precision component solutions that improve competitiveness of its customers in various industries. Through innovative product design, high-volume manufacturing expertise and efficient service it enables business partners to improve their productivity and quality as well as reduce costs of assembly, manufacturing and other processes.

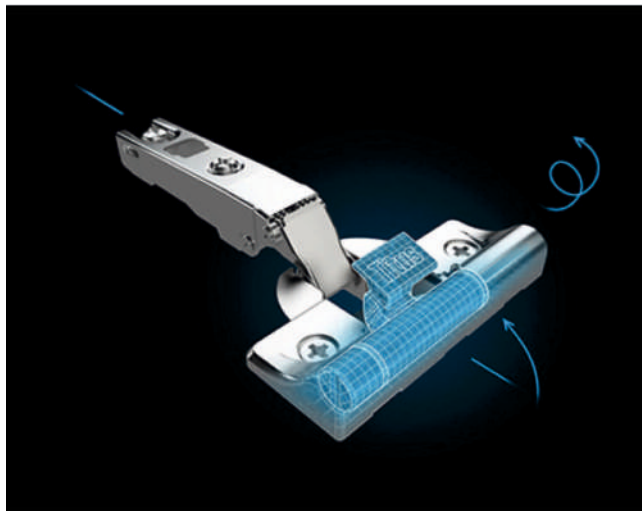

The majority of the Company's turnover comes from its core activity, the production of furniture connectors, concealed hinges and furniture damping. The precision engineering competence gained in the field of furniture hardware has been applied to other areas: multi-purpose damping technology, automated assembly systems, tooling, precision die casting service and ultrasound fastening technology in various industries such as furniture, home appliances, automotive, medical devices and hardware.

# Engineered for a purpose: improve productivity and quality while reducing manufacturing and assembly costs

Titus combines customer-led research and development, with lean processes and state-of-the-art manufacturing operations to deliver solutions that are engineered for a purpose. By keeping the customer front of mind all the way through, Titus provides its customers with component solutions that improve their competitiveness.

### B-type-i3 concealed hinge

- The most versatile hinge with integrated damping
- One for all
- Reliable open-close throughout 80,000 cycles
- Low 11,5mm hinge cup depth
- Smooth and consistent damping performance

B-type-i3, the 3rd Generation of slide-on hinge with integrated damping. Damping technology seamlessly integrated in the hinge cup delivers a consistent and reliable opening and closing performance throughout the entire life of the furniture. Hinge extended lifecycle makes it an appropriate solution for several cabinet applications in bedrooms, kitchens and bathrooms.

### T-type "3 way Snap"

- T-type designed for a lifetime consistent performance
- 100,000 cycles – guarantee of a furniture lifetime
- consistent performance (25 years of use in kitchen)
- 3Way snap-on' – ease of assembly and time savings at cabinet assembly
- ConfidentClose – life-long consistent soft closing on doors up to 34mm
- Highly tolerant – reliable and consistent door closing even in case of accidental misalignment.

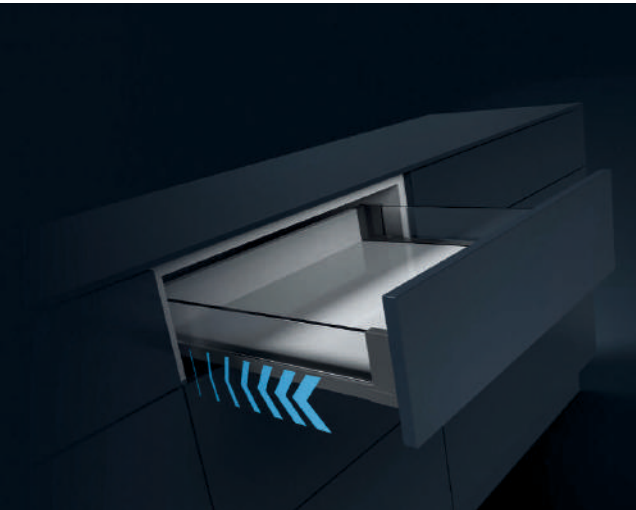

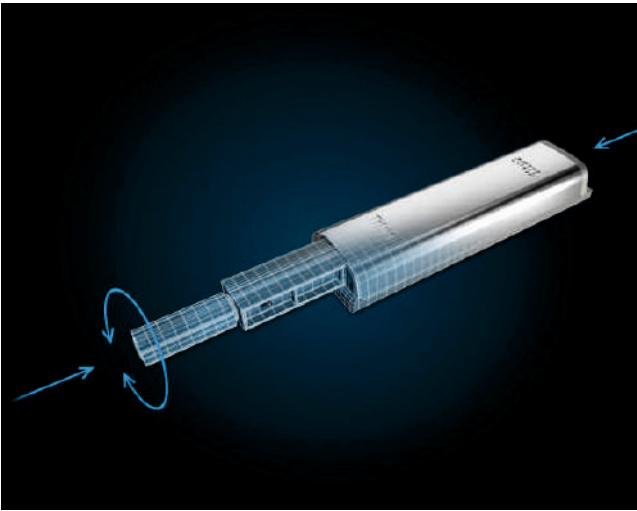

T-type hinge enables time-savings at cabinet assembly and assures a life-long performance with ConfidentClose. A long-lasting, consistent performance of 100,000 cycles is especially important for thicker and heavier cabinet doors

where sagging is an issue. Its key features are simplicity of assembly, wide tolerances and reliable soft closing on a wide range of doors. The 3Way snap-on intuitive hinge-to-plate mounting (top, front, and back) makes installation a breeze, especially on tall doors, as it significantly reduces the time and effort it takes to assemble a kitchen. T-type is designed to provide ConfidentClose, consumer preferred way of soft closing of the door: fast closing, late start of deceleration action and quiet landing with SoftTouch.

### Push Latch

- Push Latch - effortless touch opening system for cabinet doors and drawers
- Works with standard concealed hinges and drawers
- Available with linear and cross mounting plate
- Depth adjustment feature
- Rigid slide-on hinge-to-plate attachment

Push latch enables effortless opening and closing of the furniture without handles. Designed to be used with standard hinges and drawers it allows for maximum efficiency and flexibility. Push latch can be easily mounted to standard cabinet drilling pattern without additional drilling, simply by positioning it by the side panel edge. In case of accidental hits, the 'Safety click' feature prevents injury by easy detachment of the mechanism from the mounting plate. The 12mm height of the body and mounting plate, enables side mounting in drawer cabinets. The adjustment button that compensates for the door gap between -1mm and +4.5mm provides reliable closing and consistent performance even in case of inaccurate drilling. Titus Push Latch is non-handed, fits many cabinets and acts as universal solution for a wide range of furniture applications.

### Drawers

- Tekform Slimline drawer optimises space utilisation
- Sleek look
- Flexibility of runner system
- ConfidentClose with Titus damper

Ideally suited to the demanding high-end kitchen and bathroom furniture market, the new slimline version of the popular Tekform double-wall drawers, which has side panels that are just 14mm wide, combines attractive sleek appearance with greater usable space in a given size of drawer. The new version uses the same drilling patterns for runners as the standard version of Tekform drawer, ensuring easy interchangeability and flexibility in use.

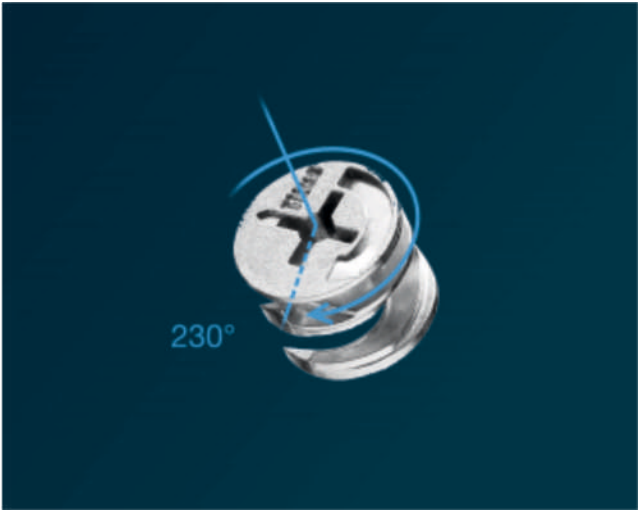

### Quickfit TL2 Dowel

Quickfit TL2 dowels makes cabinet assembly quick and easy. Just a simple push-in by hand is needed to insert them into the dowel hole – an operation completed in less than one second makes them one of the most consumer-friendly fittings on the market. Quickfit TL2 dowel is the fastest assembly system at the market allowing for factory pre-insertion in 8mm dowel holes, which can be done manually too. It helps furniture manufacturers overcome inaccurate drillings with its built-in self-adjustment feature that provides an ETHC (Edge To Hole Centre) tolerance of +/-1 mm on drilling operation. Fully tightened joint is assured even at marginal inconsistencies of drilling and problems associated with the natural movement of wood panels

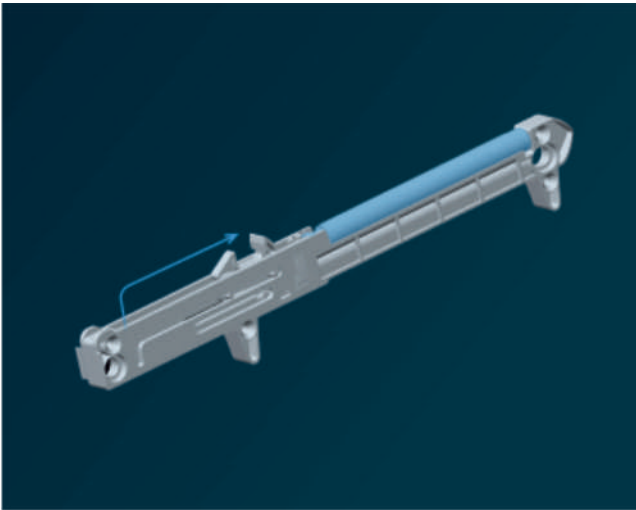

CAM 5000

The new Cam5000 is our strongest cam. It comes with a smooth and reliable locking action for easy, flawless and confident furniture assembly.

The reinforced cam evenly engages in the hole and prevents it from tilting or bursting while tightening. Increased joint resistance enables effective performance in a wider tolerance range. A linear cam profile ensures a smooth tightening action and great dowel pull-up, for confident furniture assembly and improved quality of finished products. Optimised torque assures a noticeable stop and lock at 2 o'clock (230°). The cam fully engages in the dowel, creating a resistant joint with no gaps between panels.

Soft Close Solutions for Cabinets and Drawers

Titusoft close solution for Drawers

Titusoft close Dampers for Drawers is a Reliable universal damping for wooden and metal drawers. Titusoft drawer dampers are easy and intuitive to install: they are positioned on the front side of the cabinet for simple, fast and precise installation. Available for both metal drawers (MD) and wooden drawers (WD).No pre-drilling is required, as it can be done while mounting the furniture or later, when furniture is already in use.

Glissando Soft-close solution for Doors

Glissando TL170 -This soft closing solution is designed for concealed hinges with 170 degree opening angle. It assures a life-long reliable performance and comes with our Confident Close: silent, fast and safe soft closing system. Consumers love the tool-free assembly and the easily accessible damping adjustment button. Hinge damping can be adjusted to fit different types of doors. Use one Glissando per two or three hinges for maximum efficiency. Consistent and reliable performance on doors of different sizes and weights.

Confident Soft Closing features

Titusoft MD/WD & Glissando features Confident-Close, consumer-preferred way of soft closing action. It is characterized by:

- Fast closing
- Quiet landing with SoftTouch
- Late start of deceleration action
