Engineering progress Enhancing lives

RAUSHELL Bravura®

Weather-proof External Cladding

Protect the protector

A global leader in polymer processing technologies

When Helmut Wagner founded REHAU in 1948 with just 2 employees, he illuminated the way forward with the principles of competence, passion, and innovation. Today, REHAU is an independent, family-owned company that has over 20,000 employees across 50 countries.

In every part of the world, the brand is redefining the interaction between our products and customers by engineering progress that enhances lives.

For the past 70 years, the ambition to enhance the lives of people around the world through innovative polymer-based solutions, along with the lessons from our predecessors, has been the driving force behind REHAU's success. Through our vigorous zeal and relentless efforts, we redefine what is possible in construction, automotive and industry, every day.

Our insightful knowledge of the market and materials, complemented by tremendous experience in technology and manufacturing processes, allows us to cater to wide-ranging needs with customised solutions. This includes improving road safety, enhancing the aesthetic appeal of homes, reducing energy consumption in buildings, and more. As a family-run business, we think and act with a view to future generations – keeping with the principles of sustainability. By remaining focused on the growing importance of quality, efficiency, and sustainability, we will continue our odyssey to make lives safer, healthier, and more efficient across the world.

India footprints

REHAU commenced operations in India in 1997, with the establishment of a local manufacturing unit in the Pune district of Maharashtra to cater to the local industrial market. Since then, it has established 3 plants and employed 600+ aspirants across the country.

The Germany-headquartered company is dedicated to beautifying and enriching homes with innovative solutions. REHAU prioritises and delivers superior solutions - from product design to applications - while providing superior variety in terms of choice.

With more than 1000 direct customers and nearly 2500 retailers, REHAU has exceeded expectations by establishing an enormous client base in India. With 4 offices and 3 experience centres, 6 warehouses and a huge sales network spread across the country, REHAU in India has become a polymer leader by rapidly capturing the market and managing its operations. It offers a wide range of products that enable customers to experience premium quality and raise their standards.

These product choices are versatile enough to accommodate new changes and that too with convenience. REHAU ensures that a positive difference is made through quality, innovation, and choice.

REHAU is equally concerned with ecological and resource protection. In kitchens, our goal is to improve the finish and aesthetics of modular kitchens. We endeavour to provide high-quality, sustainable products.

Let's live with quality!

Engineering progress Enhancing lives

Our promise of enhanced living is built on 3 pillars:

Trust

With synergy in effort, and trust in each member of the REHAU network, we make the impossible happen.

Innovation

Our strength is derived from innovative ideas that ameliorate the ordinary for extraordinary results and performance.

Reliability

Our adherence to ethical guidelines is the foundation of our corporate conduct. Our vision is for a better today and a greater future ahead, making us a reliable partner for your needs.

RAUSHELL Bravura®

The four walls around you withstand every challenge to protect you against external adversities. Every home, every building, and every piece of architecture symbolises safety. To ensure the security of your safekeeper, REHAU has introduced a one of a kind product, RAUSHELL Bravura[®] Exterior Wall Cladding.

RAUSHELL Bravura[®] enhances the aesthetic look and increases the durability of the building's exterior. The high-quality exterior facade panel provides a lightweight and strong solution against every external challenge, natural or human. RAUSHELL Bravura[®] helps you modernize your building's exterior with imaginative styling and brilliant designs. With a variety of colours to offer, you get an amazing range of the best building exterior that can fit seamlessly with other materials.

Protect your protector

RAUSHELL Bravura[®] provides durability and long term protection to your protector against factors like heavy rain, dampness, chemical contaminants in the air, severe temperatures, and exposure to extreme sunlight, without compromising on the beauty and designs.

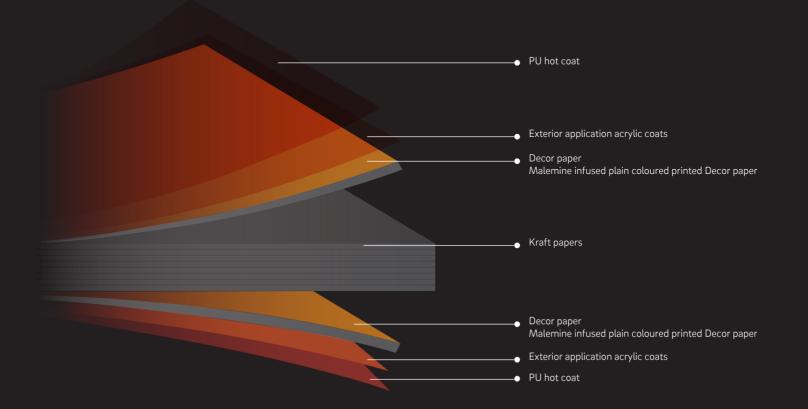

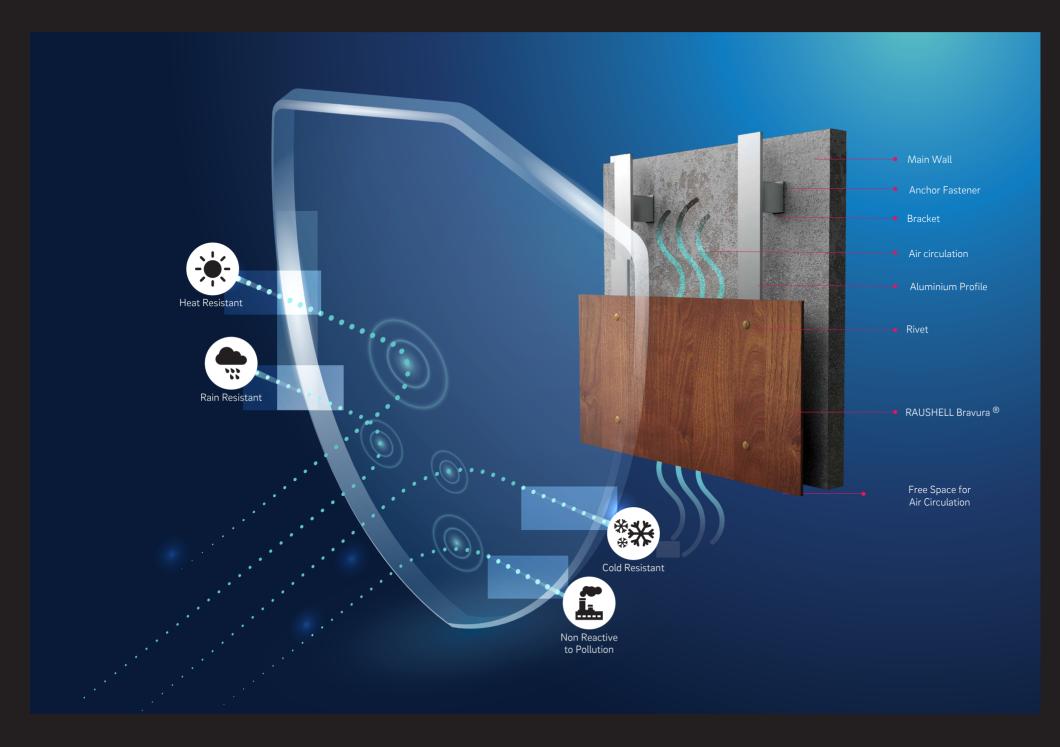

German technology for architectural Inspiration

RAUSHELL Bravura[®]. is a HPl compact laminate with an intrinsic surface, manufactured using conventional PMMA based UV or hot coating technology. It's made with a blend of celluose fibers and thermosetting resins, under high pressure and temperature. Available in a wide range of colours, RAUSHELL Bravura[®]. is the perfect external cladding solution that can conveniently be used in combination with other materials.

HPL Compact:

- Exterior Decorative Panels are manufactured by: Impregnating large amount of kraft papers having resin-absorbing capability.
- Pressing under high temperature of 180° C-220° C and pressure of 120kg/cm²

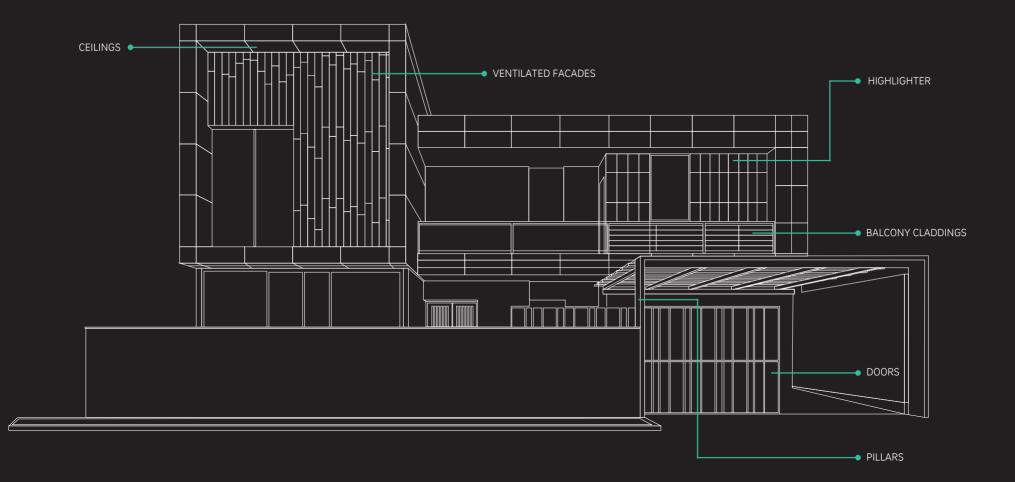

RAUSHELL Bravura® Protection System

RAUSHELL Bravura[®] Exterior Wall Cladding has been carefully designed to be resistant to specific environmental factors that the buildings are exposed to. With a combination of water-resistant materials to repel water and reflective coatings to minimize heat absorption, RAUSHELL Bravura[®] protects your protector against rain and sunlight. The cladding is put in place using techniques that create a barrier between the exterior walls and the environment. This includes installing an air gap between the cladding and the walls to allow for proper ventilation that maintains a favorable temperature inside while also preventing moisture buildup.

Application Scope

RAUSHELL Bravura[®] wall cladding can be used on a variety of external surface and adds a fresh layer of protection to variety of sites. Let's have a look at the possibilities of using Bravura cladding for different sites of your building:

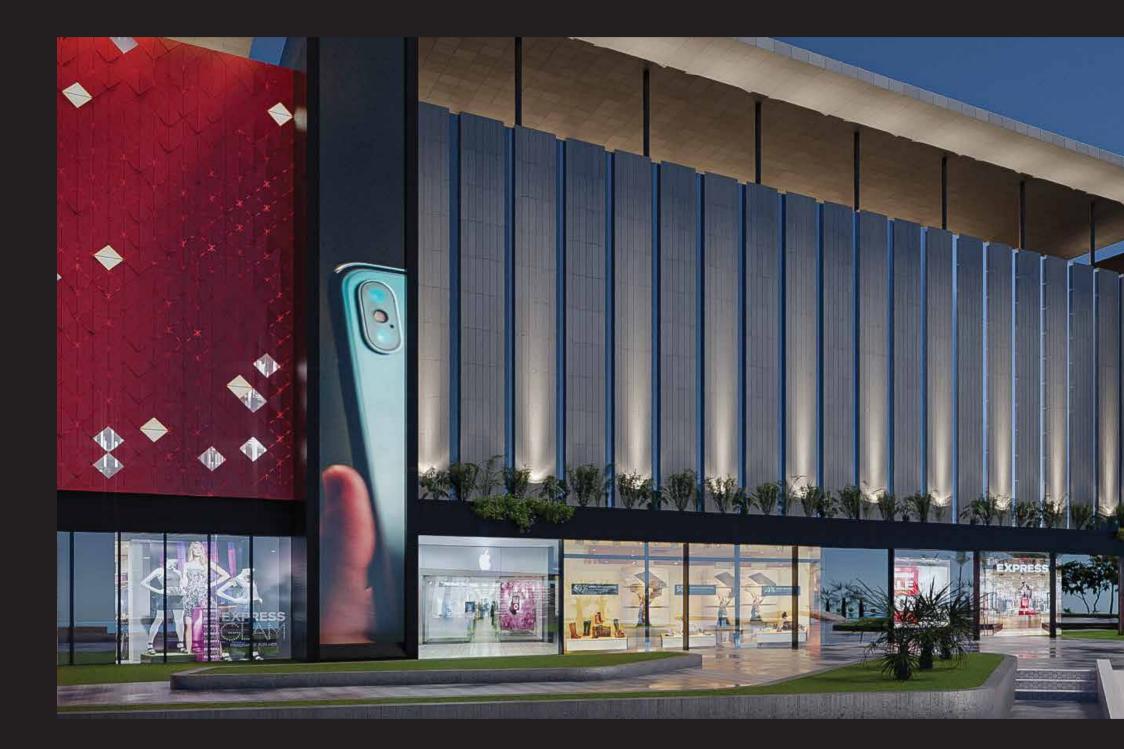

01 KILIMANJARO 2006C 02 AQUAMARINE 3002C

Hotels

Don't keep your hotels just a place to spend a night, rather than uplift the experience of your customers by providing a place beyond just the roof, but a home away from home.

Commercial

Be it a small one like a retail shop, or a big shopping complex or mall, everyone requires a kind of outdoor look that attracts business opportunities and customers. Define your innovative spaces with an innovative mixture of surfaces.

01 *MALARSTALL 3001C 02 AQUAMARINE 3002C

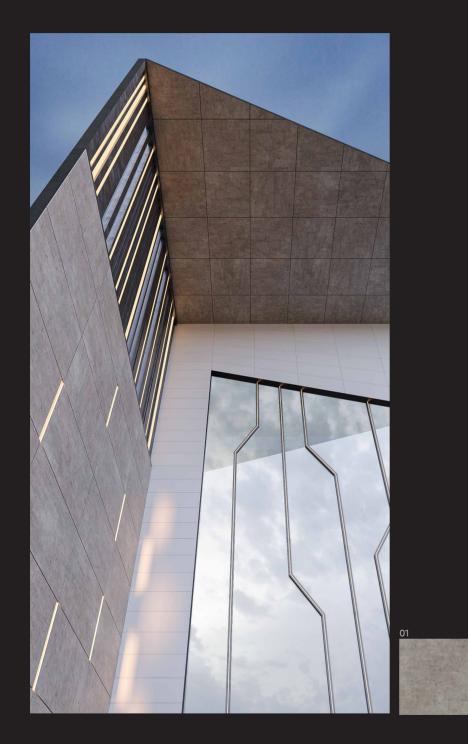

Residential

The essence of a home is found in the characteristics of the people who reside in it. Give that space a vibrant look with different textures that define your nature.

Sustainability at its core

Sustainability has become an increasingly important consideration in the design and construction of buildings, and wall cladding is no exception. One of the ecological key aspects of wall cladding is the use of materials that are energy-efficient and have a low environmental impact.

This can include using materials that are made from renewable resources. the material of wall cladding should also be durable and able to withstand to last for a long time, reducing the need for frequent repairs or replacements. In this way, not only energy and resources are conserved, but also the overall lifecycle cost of the building is reduced.

Overall, wall cladding is an essential component in the construction of buildings that are designed to be energy-efficient, environmentally friendly, and healthy for occupants. By incorporating sustainable materials and systems into wall cladding design, building owners and developers can help to reduce their environmental impact, lower operating costs, and create a more comfortable and pleasant indoor environment.
