

Maintenance Electrician

Plant Blaenau

The REHAU Group is a unique and diverse family of eight strong Subgroups consisting of REHAU Interior Solutions, REHAU Building Solutions, REHAU Window Solutions, REHAU Automotive, REHAU Industrial Solutions, REHAU New Ventures, the Meraxis Group, RAUMEDIC and the services division REHAU Global Business Services. Each focuses on the specific needs of their target groups with their individual competencies. This industry- and trade-specific focus enables each of the companies to lead in their respective markets and, at the same time, to complement each other within the REHAU Group to successfully engineer progress and enhance lives together. More than 20,000 employees at 190 locations worldwide apply their expertise and innovative capabilities to ensure the continuous growth of our independent privately-held company. REHAU is the place to build a career, so why not join our team and contact us today!

Your role:

Reporting to the Electrical Supervisor, you will carry out reactive and preventative planned maintenance activities on all plant equipment and services.

Responsibilities include:

- In the event of problems, faults and failures, carrying out effective troubleshooting using specialist knowledge and fault finding techniques to restore production as soon as practicably possible.
- Carrying out periodic inspection, testing & calibration on electrical equipment;
- Carrying out a range of industrial project work on low voltage, extra low voltage, data cable systems & control cabinet construction;
- Installing, maintaining, and repairing electrical systems generally
- Collaborating with and supporting the instrument technicians on process projects and troubleshooting issues.

Day and Shift positions available. Day positions work Monday – Friday 37.5 hours. Shift positions work 12 hours per shift and are based on either 3 or 4 shifts per week, according to pattern including some Night shifts and Weekend working. Applicants must be willing to cover shifts at short notice.

Your profile:

- A motivated time served industrial electrician, having recognised Electrical Engineering qualifications, through serving an Engineering Apprenticeship (preferably to HNC level), plus current relevant experience working in an industrial location;
- Excellent problem solving / fault finding skills;
- Experienced with working on PLC systems (such as SIEMENS S7) and knowledge of industry 4.0 (smart working) is desirable.;
- Knowledge of energy management to ISO 50001 an advantage, as well as some experience with performing mechanical maintenance activities;
- Able to interpret basic electrical symbols and drawings (EN60617UK). Preferably, certified with an '18th Edition Wiring Regulations BS7671:2018);
- Able to work as part of a team with good communication skills, with the ability to influence others
- Be a critical thinker, being able to analyse information and provide a solution to situations effectively;
- Right to work in the UK is essential.
