WINDOWS. REINVENTED FOR MODERN LIFE.

DESIGNED FOR PERFECTION

Rio Flush Fit Windows

The REHAU Rio Flush Fit window is the first range to combine the realistic look and feel of timber, with all the benefits of uPVC. Born out of REHAU's state-of-the-art UK manufacturing plant, REHAU is proud to bring this modern design to you and your customers.

A photograph of a two-story house with a light-colored stone facade and a red-tiled roof. The house features several windows with grey frames and light-colored surrounds. A black downspout runs vertically on the left side. A black metal fence is in the foreground. A white callout bubble is positioned on the right side of the image, containing text.

Created to offer competitive advantage to all fabricators and installers, the Rio Flush Fit window provides a solution that challenges traditional timber options. With tool investment and additional stock holding kept to a minimum, it can be seamlessly introduced into production.

ATTENTION TO DETAIL

Rio Flush Fit Windows

The Rio Flush Fit is all about offering the customer **more choice** with little extra work required from the installer. However, as any good window professional knows, the **details within the sashes** are crucial to the finished product.

The Rio Flush Fit system allows manufacturers and installers to **replicate the details** of a traditional timber flush fit window in the most authentic way possible.

This is achieved through the **three jointing solutions** which provide **different aesthetics** to suit any style of property:

1

Full Weld Joint

The same as a standard casement window offering the most cost effective option

2

Full Mechanical Joint

The most realistic timber flush fit window appearance for ultimate authenticity

3

Mechanical/Weld Joint (MechWeld)

Offering the appearance of mechanical-style timber joints on the outside with a fully welded detail inside

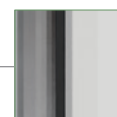

28mm Glazing
as standard with
option for 34mm
Triple Glazing

Integral Low
Level Gasket

Traditional
Low Level
Sculptured Bead

External
Chamfer detail
for smoother
sightlines

Eurogroove in
same position as
TOTAL70 ensures
no specialist
gearing required

Three Jointing Options:

Full Weld Joint
Mechanical/Weld Joint
(MechWeld)

Sleek and Smart

The Rio Flush Fit features clean lines and a true finish in order to ensure minimalist impact on the property's exterior. A variety of styled hardware and fittings are available to guarantee consistency with the look of any building.

Available in both chamfered and sculptured frame options, Rio can suit any installation. The Rio Flush Fit French window has a hidden dummy mullion end cap which is over moulded with a gasket for a more seamless finish.

The detailed external chamfer on the sash allows for softer aesthetics and is in line with the REHAU Heritage Vertical Slider. It also utilises the Heritage bead for a low level sight line. REHAU Heritage Georgian bars can be used to provide a chamfered finish outside and sculpture inside for that traditional look.
