

RAUKANTEX DESIGNO

FINISHING WORKTOPS TO PERFECTION

RAUKANTEX designo is designed for finishing kitchen worktops and counter components. Using the new product range in the tried and tested ABS material you can move away from the postformed worktop and design curved shapes with tight radii. Our design collection is matched to the collections of all board manufacturers. Through the application of up to five or six print overlays, we can even create complex stone decorative designs, reinforcing our expertise in printing and design time and time again.

ADVANTAGES:

- Special development for the worktop
- Decorative print is resistant to water vapour
- Consistent appearance of décor finish even when chamfered
- Natural looking decorative prints/designs
- Multi-colour printing (up to six colours possible)
- Variety of decorative designs
- Very tight radii possible
- Good chemical resistance
- High UV resistance (level 7 to 8 on the wool scale)
