Product: RAUTACK Foam Staples

Date: 01 June 2023 (supersedes, 01 November 2021)

Article No.	Description	Unit weight	
		kg	lb
266187-100	RAUTACK Foam Staple, 1 1/2" long	.0012	.003
266197-100	RAUTACK Foam Staple, 2 1/4" long	.0015	.003

TECHNICAL DESCRIPTION

Material	Thermoplastic polymer

FUNCTIONAL DESCRIPTION

For use with RAUPEX® pipe to install on rigid foam board insulation, (extruded polystyrene is recommended). The 1 1/2" staple is for use with minimum 1" (25 mm) thick insulation. The 2 1/4" staple is for use with minimum 1 1/2" (38 mm) thick insulation.

RAUTACK foam staples work with 3/8", 1/2", 5/8" and 3/4" RAUPEX pipes installed in RFH and SIM applications. Staples are strong enough so that typically only one staple is required every three feet (90 cm) on straight runs of pipe, with one staple in the middle of bends.

The RAUTACK foam staples are installed from a standing position and for use only with RAUTACKER Stapler Tool (discontinued Art. No. 266177). RAUTACK foam staples are not compatible with RAUTACKER 3D Stapler Tool (Art. No. 298956-001). Follow all published installation instructions.
