1. MUNICIPEX WATER SERVICE PIPE

MUNICIPEX Water Service pipe is manufactured using the high-pressure peroxide extrusion method for crosslinked polyethylene (PEXa). MUNICIPEX has a co-extruded blue PE shield that protects the pipe against ultraviolet light (sunlight) for an extended time.

MUNICIPEX pipe meets or exceeds the requirements of ASTM F876, CSA B137.5 and PPI TR-3, and is certified to NSF Standards 14/61 and AWWA C904. MUNICIPEX meets the requirements of ASTM F2023 for chlorine resistance. MUNICIPEX is manufactured by REHAU using a quality management system that has been certified to the latest version of ISO 9001.

MUNICIPEX is produced in SDR 9 copper tube sizes (CTS) so that it is compatible with AWWA C800 valves and fittings when used with manufacturer's recommended insert which is required to stiffen the pipe. MUNICIPEX can also be used with the EVERLOC+™ compression-sleeve fitting system, certified to ASTM F877.

See applicable REHAU technical documents for detailed temperature and pressure ratings.

For service line and underground applications, it is the responsibility of the installer to ensure fittings selected meet local jurisdictional codes.

2. MUNICIPEX PRE-INSULATED PIPE

MUNICIPEX Pre-insulated pipe is specially designed for water distribution in extreme cold climates that require an extra level of protection from freezing, or when laying pipe below the frost line is not possible.

MUNICIPEX Pre-insulated consists of MUNICIPEX PEXa Water Service Pipe surrounded by a solid layer of CFC-free polyurethane foam insulation and a corrugated LDPE outer casing. The outer casing "locks" the pipe firmly into the backfill while the insulation is bonded to both the outer casing and the MUNICIPEX Water Service Pipe, increasing durability and flexibility.

MUNICIPEX Pre-insulated is available in up to 300 ft (94 m) coils to reduce the number of joints needed for long pipe runs and provide ease of installation. MUNICIPEX PEXa Water Service Pipe, connects easily to standard industry brass curb and main stops with the use of a stainless steel or plastic inserts. MUNICIPEX Pre-insulated includes an integrated conduit to accommodate electric heat-trace cable.

The same standards and specifications as MUNICIPEX Water Service pipe apply.

3. MUNICIPEX FORCE MAIN PIPE

MUNICIPEX Force Main pipe is used in a Publicly Owned Treatment Works System for conveying wastewater under pressure from the discharge side of a pump or pneumatic ejector to a discharge point.

MUNICIPEX Force Main is color-coded with a green co-extruded coating and made with the high-pressure peroxide extrusion process for crosslinked polyethylene (PEXa). MUNICIPEX Force Main is flexible, easy to handle, and has a smooth interior wall for superior flow and constant pressure. MUNICIPEX Force Main is offered in coil lengths up to 500 ft (152.4 m) to reduce the number of joints as well as cost and time associated with installation.

MUNICIPEX Force Main meets or exceeds the requirements of ASTM F876, CSA B137.5 and PPI TR-3, and is certified to NSF Standard 14 and AWWA C904. MUNICIPEX Force Main meets the requirements of ASTM F2023 for chlorine resistance. MUNICIPEX Force Main is manufactured by REHAU in a plant using a quality management system that is certified to ISO 9001.

MUNICIPEX Force Main is produced in SDR9 copper tube sizes (CTS) so that it is compatible with AWWA C800 valves and fittings when used with manufacturer's recommended insert which is required to stiffen the pipe.
