MUNICIPEX® force main pipe

FUNCTIONAL DESCRIPTION

MUNICIPEX force main pipe is used in a Publicly Owned Treatment Works System for conveying wastewater under pressure from the discharge side of a pump or pneumatic ejector to a discharge point. MUNICIPEX force main is manufactured using REHAU's high-pressure peroxide extrusion method for crosslinked polyethylene (PEXa). MUNICIPEX force main meets or exceeds the requirements of ASTM F876, CSA B137.5 and PPI TR-3, and is certified to NSF Standard 14 (cNSFus-sw) for sewer applications and AWWA C904. MUNICIPEX force main meets the requirements of ASTM F2023 for chlorine resistance. MUNICIPEX force main is manufactured by REHAU in a plant using a quality management system that is certified to ISO 9001.

MUNICIPEX force main is produced in SDR9 copper tube sizes (CTS) so that it is compatible with AWWA C800 valves and fittings when used with manufacturer's recommended insert which is required to stiffen the pipe.

LONG-TERM STRENGTH

The maximum temperature and pressure ratings of the MUNICIPEX force main are in accordance to ASTM F876, CSA B137.5 and PPI TR-3. The designer shall determine the actual conditions and apply the appropriate and additional design factors as required for any particular project. The temperature and pressure ratings apply to the application of MUNICIPEX force main for conveying hot and cold water at the 2.0 safety factor on allowable working pressure according to ASTM and CSA. REHAU confirms a 200 psi (1380 kPa) pressure rating at 73.4°F (23°C) when using a 1.5 safety factor; see REHAU *Technical Bulletin 239 MUNICIPEX Pressure and Temperature Ratings*. According to the REHAU *PEXa MUNICIPEX Force Main Limited Warranty*, the MUNICIPEX force main pipe warranty period of 5 years is for operating conditions at or below 180°F (82.2°C) in permitted applications when the handling, use, installation and maintenance continually complies with all REHAU technical guidelines.
