

THE HEATHMAN HOTEL, KIRKLAND, WASHINGTON

SYSTEM 4500 TILT-TURN WINDOW AND DOOR DESIGN

PROJECT PROFILE

Tilt-Turn French Doors Enhance the Charm and "Built Green" Status of a Boutique-Style Hotel.

This 91-room boutique hotel in Kirkland, Washington, offering tranquil lakeside views and a boutique-style feel, was designed with the highest level of guest comfort in mind. The Heathman Kirkland also features a spa, meeting space, restaurant and bar, plus a underground garage totaling 119,000 SF. The style and materials are consistent with the city's historic buildings, featuring arches and balconies as well as brick and stucco finishes. The construction is metal stud and concrete.

REHAU System 4500 tilt-turn French doors, which exit onto the guest rooms' Juliet balconies, contribute to the hotel's aesthetic charm while also enhancing comfort by providing excellent energy efficiency and sound abatement properties. In addition, the System 4500's energy-saving design was a contributing factor to the Heathman's designation as the first "Built Green" hotel to be constructed in Washington state.

The System 4500 tilt-turn design is REHAU's top-of-the-line commercial fenestration product offering. This design allows the window to operate in either a tilt or turn position, offering three separate functions in one window: traditional casement look in the turn position, convenient top ventilation in the tilt position, and elegant picture window when closed.

The System 4500 window and door design offers the ultimate in high performance. Its features include:

- Compression seal sash with two weather seals
- Multi-point locking hardware
- Superior sound abatement properties
- Ability to build awning and hopper styles with natural ventilation while providing security
- Ability to reduce heat loss and noise infiltration, providing a warmer, more comfortable living space

Project: Heathman Kirkland Hotel

Location: Kirkland, Washington

Type of Construction: New construction

Scope of Project: 182 doors

Owner: Kirkland Hotel Group, LLC

Architect: Jensen/Fey Architecture
