
TECHNICAL BULLETIN TB140

USE OF RAUPEX[®] PIPE AND THE PROPEX[®] FITTING SYSTEM

Product: RAUPEX Pipe
Date: 16-Dec-10 (Supersedes 15-Sep-10)

REHAU recognizes the ProPex fitting system (know as Quick and Easy in Canada) sold by Uponor-Wirsbo, when manufactured and certified to ASTM F1960 and CSA B137.5. This fitting system has been tested by REHAU with RAUPEX pipes and has been found to be compatible.

As a result of REHAU's test experience, RAUPEX bears the marking ASTM F1960. An assembly of RAUPEX with F1960 fittings meets CSA B137.5 requirements and constitutes a CSA B137.5 assembly. When used with the ProPex fitting system, the REHAU PEXa Limited Warranty for RAUPEX pipe is still valid. The REHAU PEXa Limited Warranty does not apply to fittings or connections supplied by others.

RAUPEX pipes are marked with the ASTM standard specification numbers of compatible PEX fitting systems. This marking excludes incompatible fitting systems, but does not guarantee the compatibility of all fittings within the listed standards. System designers should contact their REHAU representative before specifying any PEX fitting system that is not recognized in REHAU's technical documentation.

Only those fitting systems sold by REHAU are included in REHAU *PEXa Limited Warranty* available at na.rehau.com/warranties. REHAU cannot warrant products it does not sell, even if they are connected to, used with, or associated in any way with a REHAU product.
