## EVERLOC+ Compression-Sleeve Tool Service

**Product:** EVERLOC+ Compression-sleeve Tools

**Date:** 01 November 2019

REHAU recommends EVERLOC+ compression-sleeve tools be serviced at regular intervals. EVERLOC+ compression-sleeve tools have an internal counter that records the number of completed cycles. When the red LED light (🔴) slowly flashes for about twenty (20) seconds upon completion of a cycle, the tool requires service.

REHAU recommended interval service includes replacement of the seals / filter / piston / fluid reservoir / hydraulic fluid, cleaning, greasing and an overall assessment to ensure the tool is in proper working order.

EVERLOC+ compression-sleeve tools are to be serviced every two (2) years or after 10,000 compression-sleeve connections, whichever comes first. EVERLOC+ compression-sleeve tools may only be serviced by an Authorized Service Center. Contact your local REHAU sales office or visit [www.na.rehau.com/toolservice](http://www.na.rehau.com/toolservice) for instructions for sending tools to the nearest Authorized Service Center.
