

ALWAYS THE PERFECT TEMPERATURE

Control your underfloor heating with ease with NEA SMART 2.0

Your own four walls. A special place, created for your comfort. The crux: the right room temperature. It's no wonder more and more people are choosing underfloor heating. However, they usually ignore one important factor: you can only achieve a true feel-good climate if you use the right control technology. This is because only individual room temperature control can deliver the perfect temperature at the right time for each room.

Discover NEA SMART 2.0, the room temperature control system which gives you special comfort moments with its smart technology. After all, you do deserve it.

NEA SMART 2.0 offers you this and many other advantages

Always the perfect temperature

Up to 20% energy savings

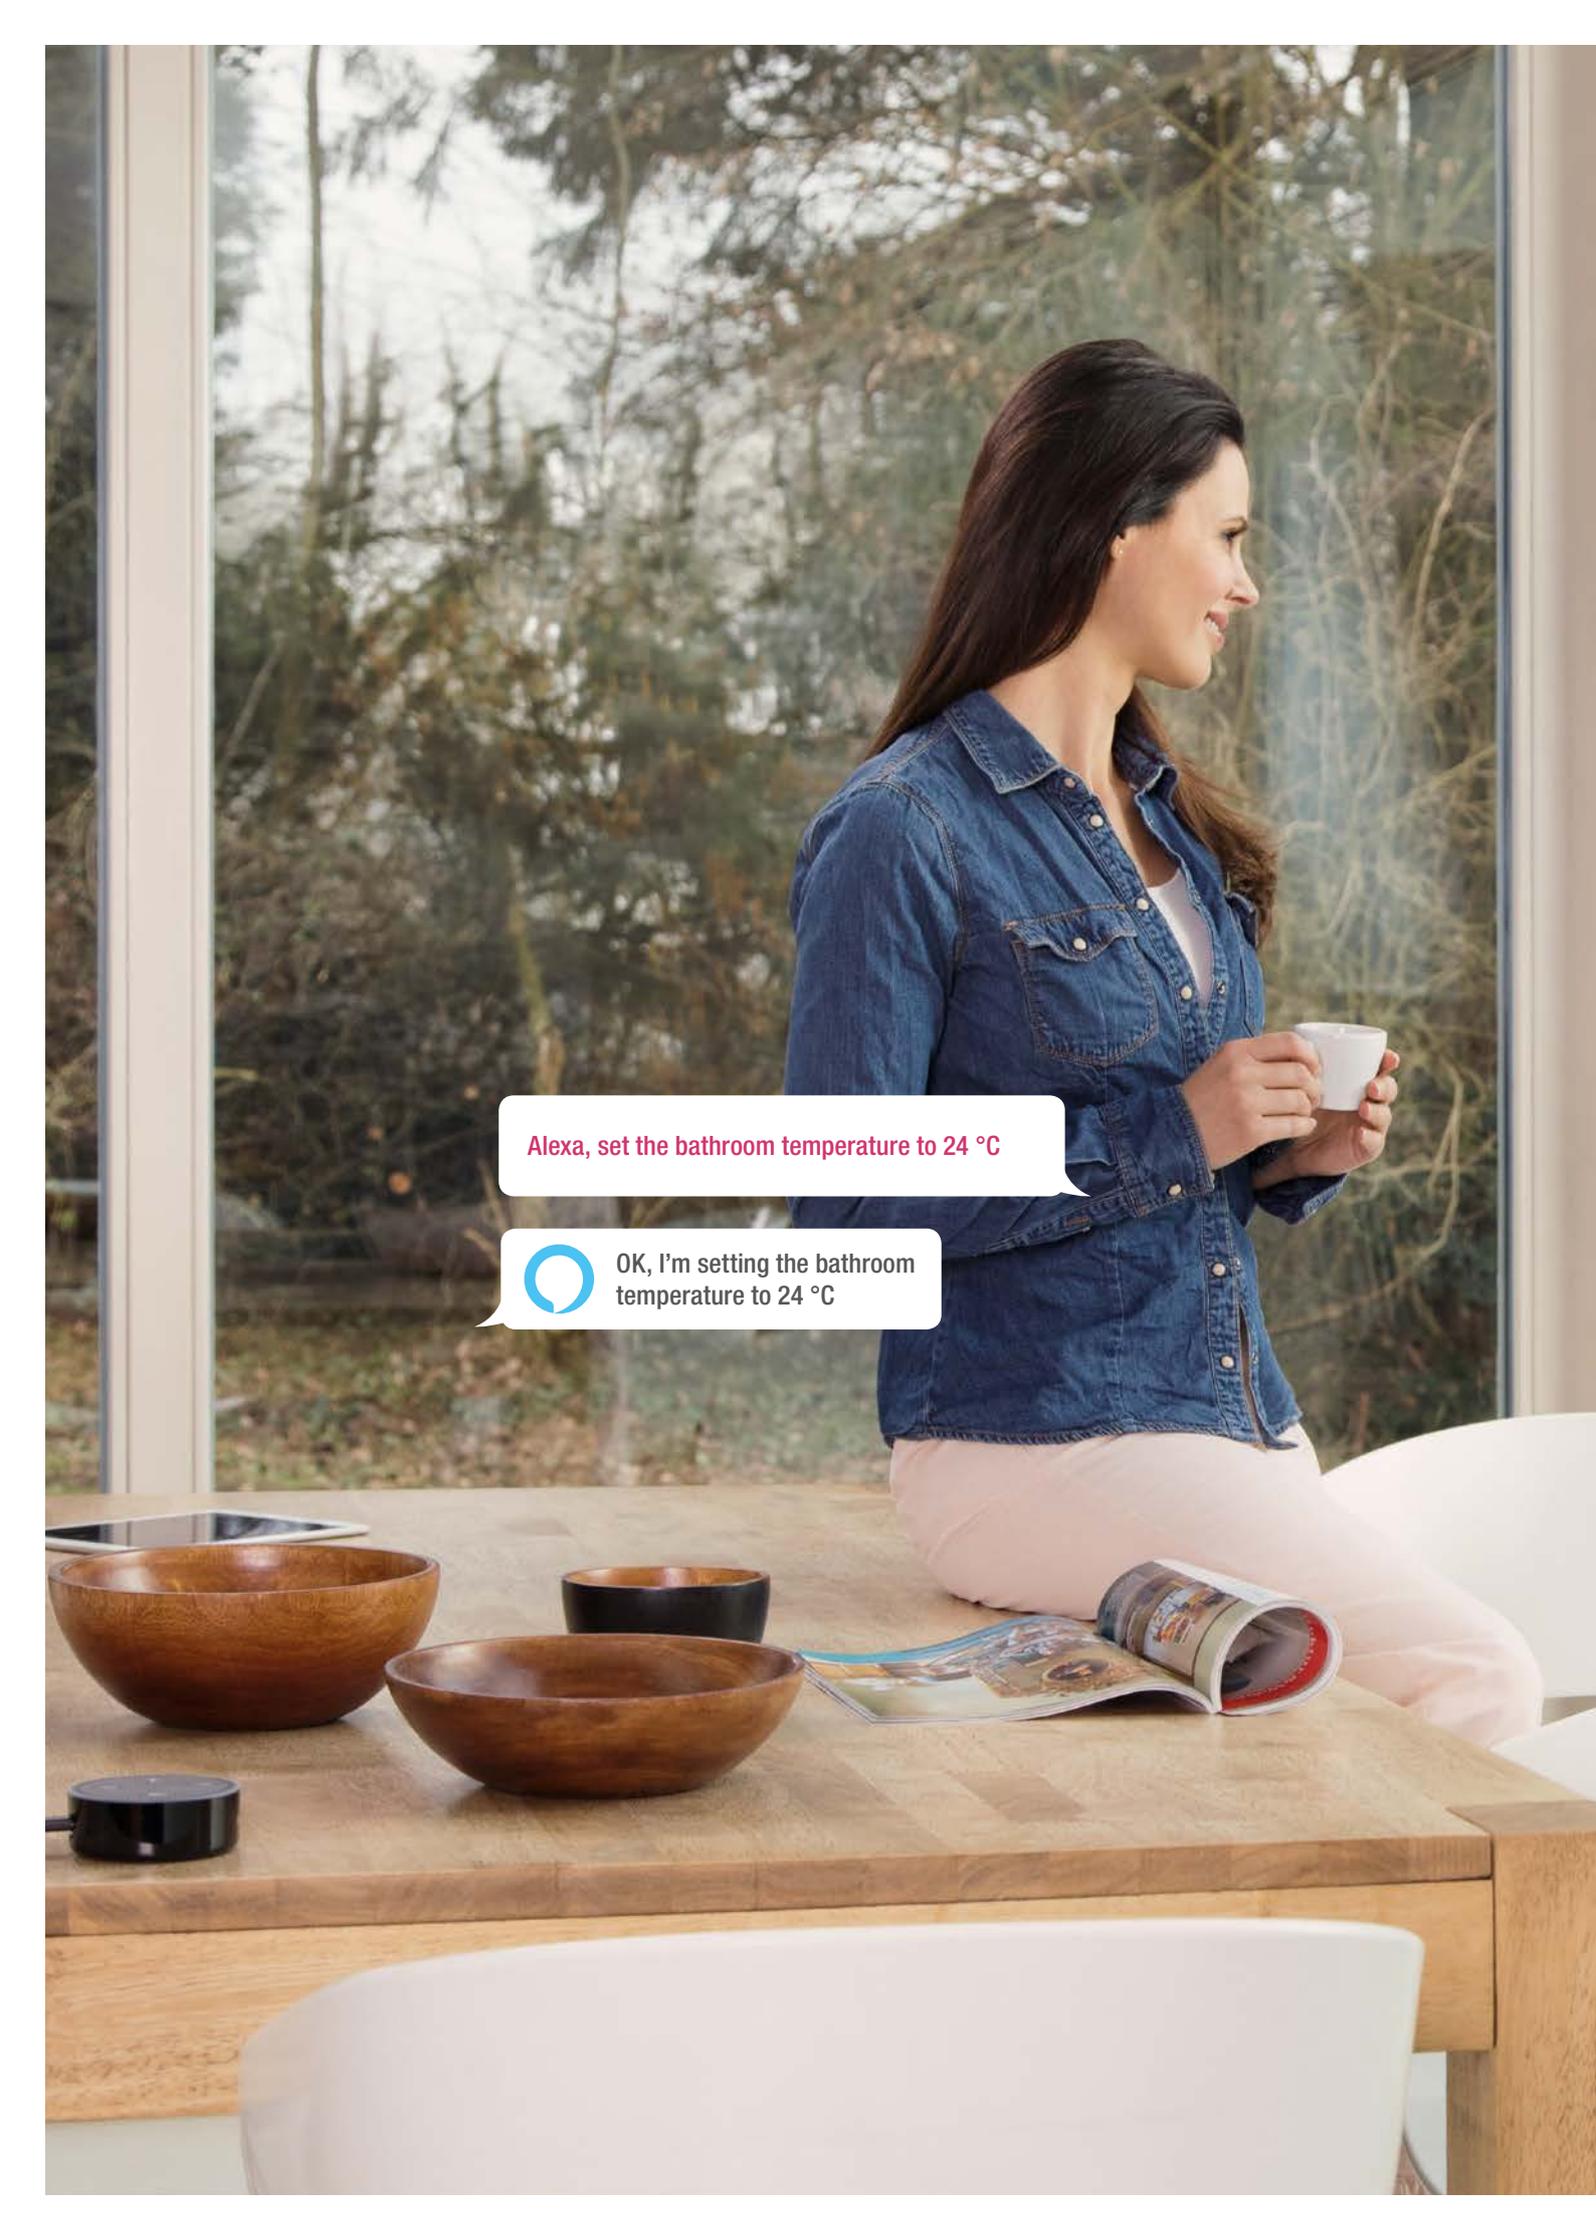

High-quality, elegant design

Intuitive use, also via an app

Future-proof complete system

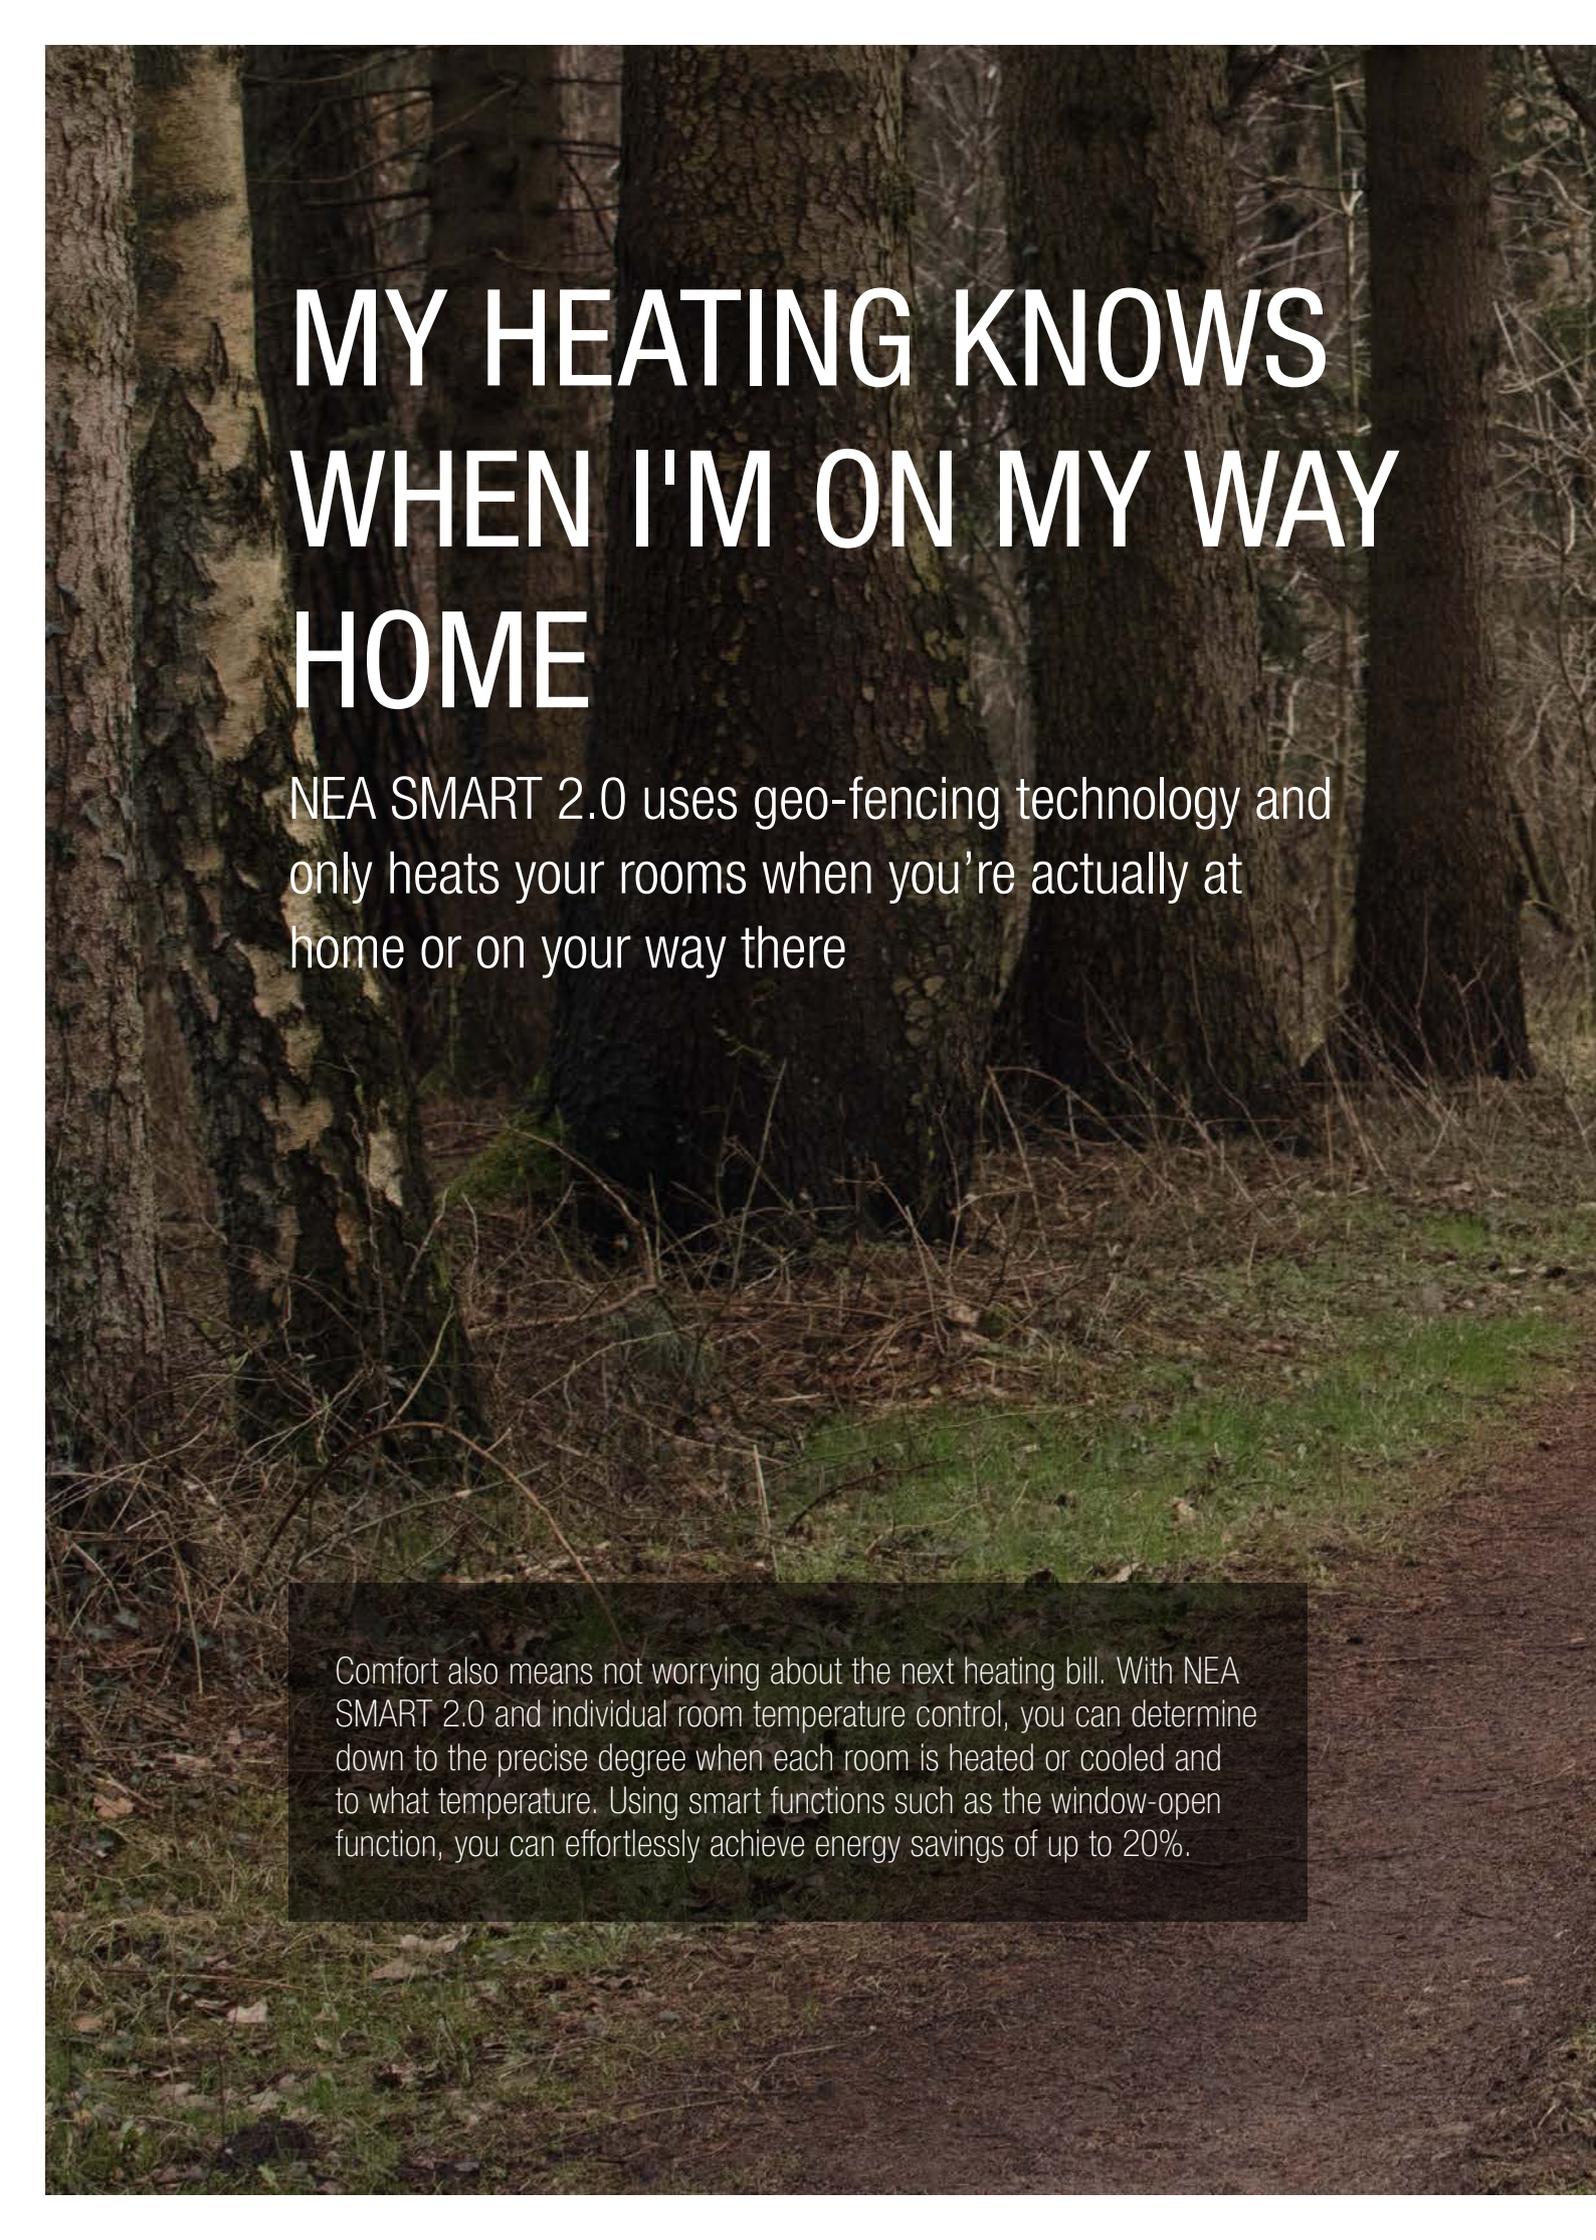

Alexa, set the bathroom temperature to 24 °C

 OK, I'm setting the bathroom temperature to 24 °C

MY HEATING SYSTEM LISTENS TO ME

The perfect temperature at all times
— and with voice control

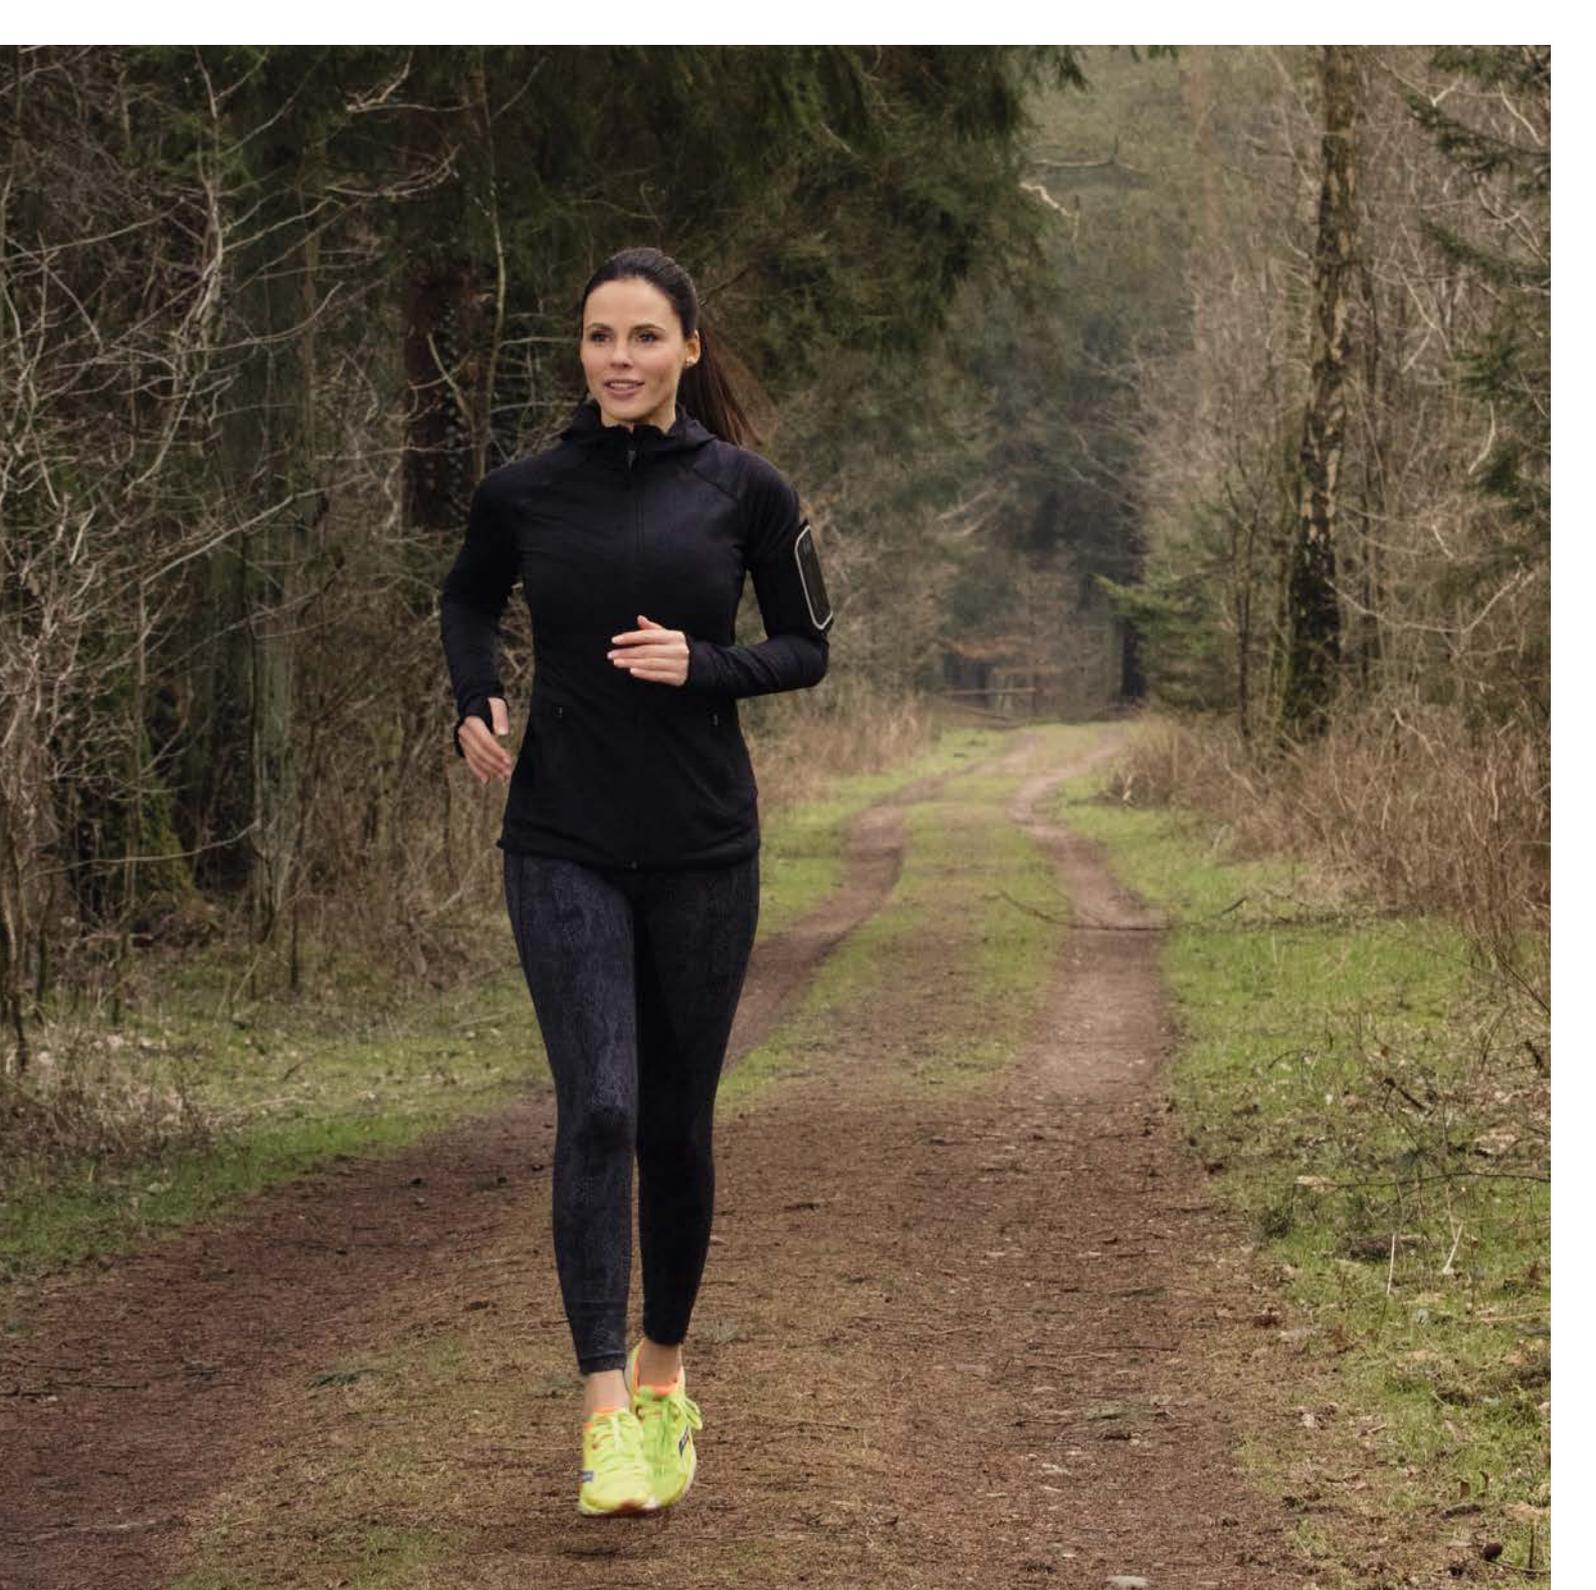

Comfort is having the room temperature you desire. Real comfort is when you don't have to worry about it. That's why NEA SMART 2.0 learns your heating and usage behaviour and automatically adjusts without you needing to lift a finger. And should you still want to make adjustments, you can do so at any time: either on the device itself, using the app anywhere worldwide or with Amazon Alexa voice control.

MY HEATING KNOWS WHEN I'M ON MY WAY HOME

NEA SMART 2.0 uses geo-fencing technology and only heats your rooms when you're actually at home or on your way there

Comfort also means not worrying about the next heating bill. With NEA SMART 2.0 and individual room temperature control, you can determine down to the precise degree when each room is heated or cooled and to what temperature. Using smart functions such as the window-open function, you can effortlessly achieve energy savings of up to 20%.

How NEA SMART 2.0 geo-fencing technology works:

When you're at home,
NEA SMART 2.0 will
adjust to your perfect
temperature

When you go out, NEA SMART 2.0
lowers the temperature, thus
saving energy

JUST ONE THAT MATCHES MY STYLE

High-quality, elegant design
in two attractive colours

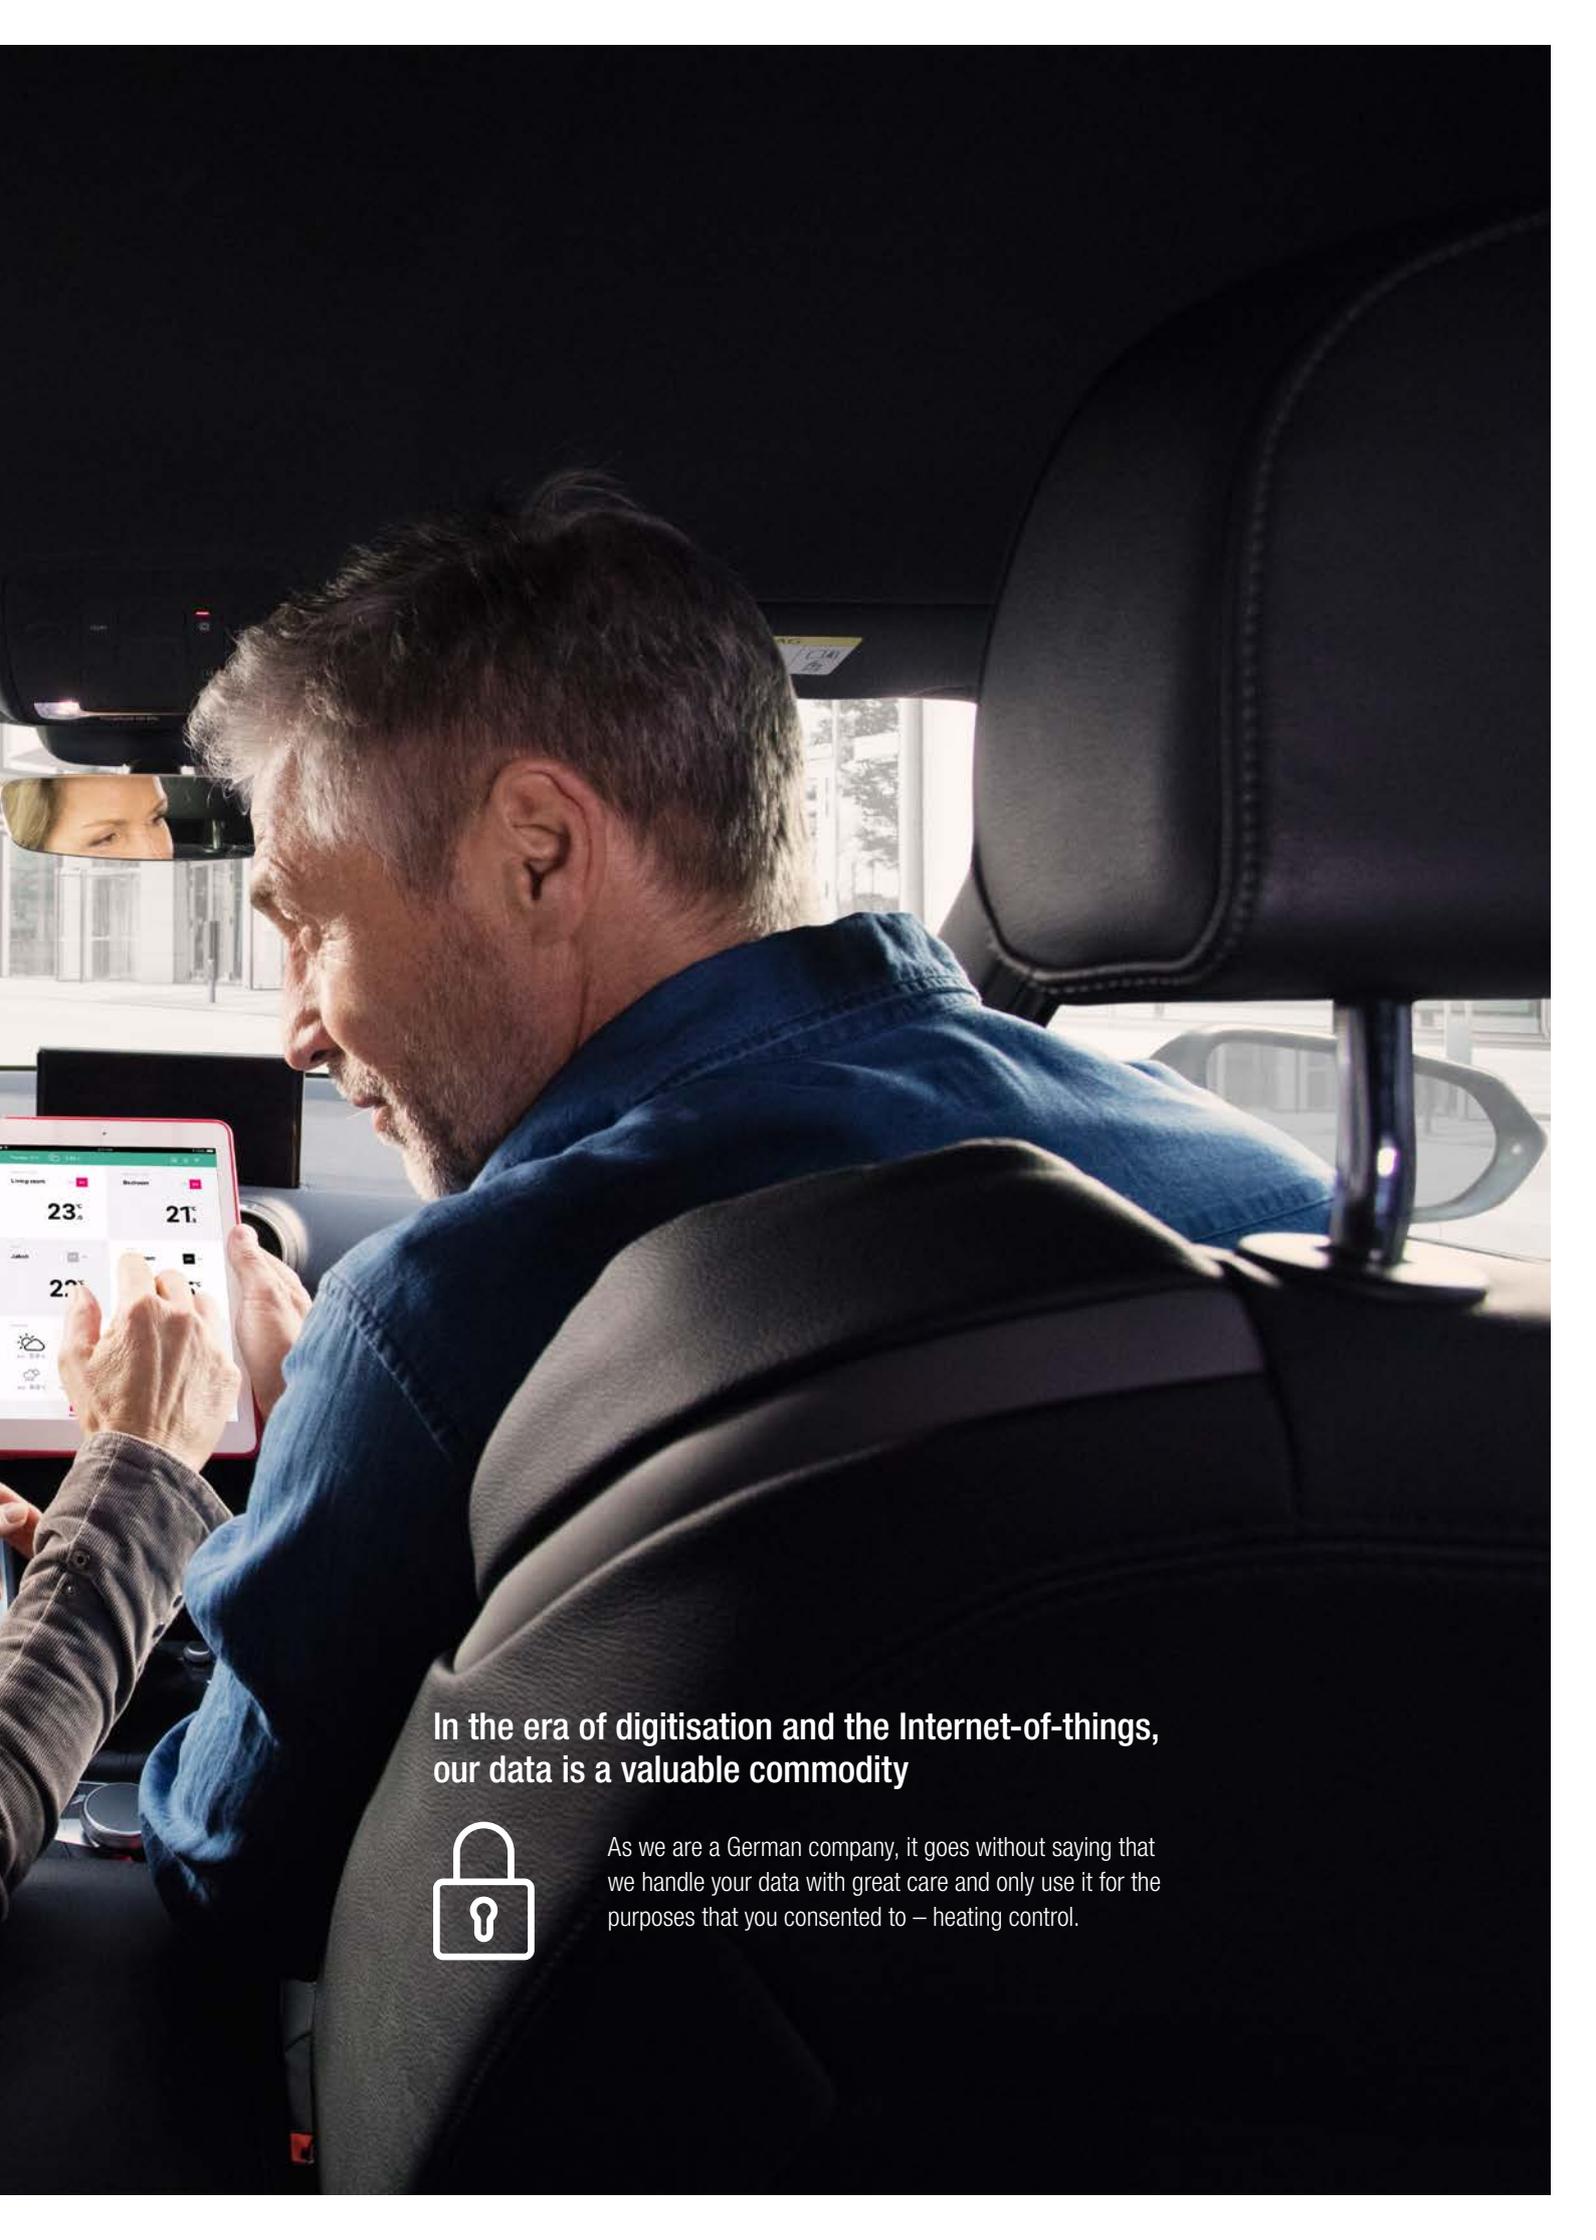

What makes a good design? One that blends perfectly into your home. And what's more, just as you want it – sleek and discreet in white or a real eye-catcher in black. If you'd like that extra something special, you'll love the NEA SMART 2.0's discreet luminescent illuminated frame and its timeless modern LED matrix display.

GOOD TO KNOW THAT EVERYTHING IS OK AT HOME

The app ensures you have everything under control, even when you're out and about

You'll always feel good with NEA SMART 2.0. The intuitive app allows you to check that everything is OK at home – from anywhere at any time. If you forget to switch off your heating, you can easily turn it off when you're out and about. If you ever require assistance, your installer can help you quickly and easily with remote maintenance.

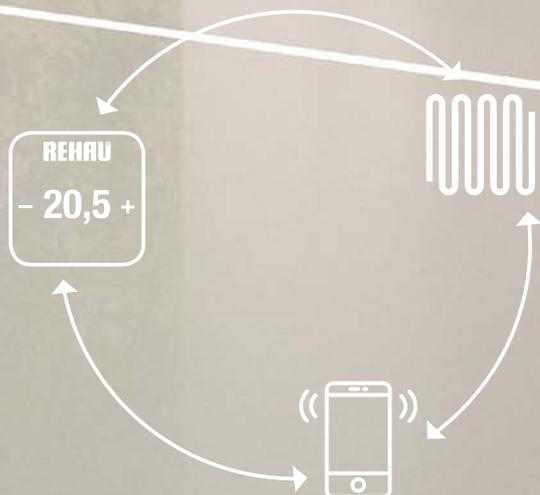

**In the era of digitisation and the Internet-of-things,
our data is a valuable commodity**

As we are a German company, it goes without saying that we handle your data with great care and only use it for the purposes that you consented to – heating control.

FEEL GOOD AT HOME IN EVERY WAY

Enjoy your feel-good climate with a perfectly
matched system from REHAU

In a fast-paced world, lasting values are something very special. As a constant in the heating market, REHAU is synonymous with reliability and a long service life. This is due to all system components, from the heating pipe to the controls, coming from a single supplier and thus being perfectly matched to one another. For greater flexibility, there is also heating for walls or ceilings, with an added cooling function, providing a true feel-good climate.

I LIKE THINGS TO BE RELAXED AND STRESS-FREE

NEA SMART 2.0 is perfectly suited for renovations – no dirt, no mess

If you wish to experience comfort with NEA SMART 2.0, there is no need to rebuild. Our intelligent room temperature control is perfect for renovations. Existing devices can be quickly and easily replaced with NEA SMART 2.0. Thanks to wireless technology, cabling is no longer required – no chiselling or plastering required. The wired option is also ideal as a replacement solution for almost all existing systems.

No matter where or when: everything is under control with the app!
 The simple, intuitively operated NEA SMART 2.0 App is available for iOS and Android.
