

SECURI SLIDE & FOLD

SLIDE AND FOLD DOORS AND WINDOWS

SECURI SLIDE & FOLD DOORS AND WINDOWS

OPEN YOUR HOME TO NATURE

Open your home to nature and maximise your living space with REHAU's new Securi Slide & Fold doors and windows. This new generation multi pane system enables you make the most of home.

The innovative slide and fold technology allows the user to move each individual pane of the door along the track to create a variety of opening sizes. The panes stack away neatly at the one side of the door to create the biggest opening possible.

Unlike the traditional folding doors, the panes do not run on wheels. Once the main panel has been opened, the other panes easily slide along a low-friction track.

The Securi Slide & Fold doors and windows can be fitted with either single or double glazing for enhanced thermal and weather performance.

SECURI SLIDE & FOLD DOORS AND WINDOWS

FLEXIBLE AND EASY TO USE

You will love the flexibility of the Securi Slide & Fold doors and windows. You can open just the main panel, or fold all the panels to one side for a full opening or even partially slide the panes across the opening for ventilation slits.

The fact that all the hardware, with the exception of the handle and profile cylinder, are concealed within the frame rebate means the doors and windows look fantastic and are very easy to clean.

Whilst the Securi Slide & Fold panels are moved, they do not take up any space either internally or externally. All panels slide inline with the frame until they reach the opening gate. Now you can place your furniture, plants and ornaments adjacent to the frame, increasing your usable living space!

The seamless simplicity of the design provides homes with improved aesthetics and beautiful lines as there are no unsightly hinges or hardware, just a simple handle on the main door.

When closed, the door interlocks together to create a solid wall with high security.

SECURI SLIDE & FOLD DOORS AND WINDOWS

ADVANTAGES TO WIN YOU OVER

- Solid, high security wall when closed
- Easy to operate
- Slide and stack one panel at a time on a low-friction track
- No unsightly hardware visible
