Care and usage instructions

Thank you for choosing a product made from this high-quality and resistant material. RAUVISIO crystal is an impact-absorbing and resistant surface material made from acrylic. It is suitable for vertical indoor use.

The non-porous, homogeneous material is easy to clean and suitable for contact with foodstuffs, and it is resistant to fungal and bacterial growth.

The product is resistant to common household chemicals, substances and disinfectants. An extended exposure to aggressive substances can leave behind marks or damage the material. Please do not use any aggressive cleaning agents, scrubbing agents or solvents. For matt surfaces, you can use a magic eraser after the cleaning, if needed.

RAUVISIO crystal is easy to clean – most soiling and finger marks can be removed with water and a microfibre cloth. In addition to this, normal household liquid cleaners can be used to clean the surface.

Strong solvents, special cleaners (e.g. drain cleaners, industrial cleaners) as well as aggressive scouring agents and strong chemical substances may damage the surface. Remove stubborn dirt with a soft sponge, commercially available plastic cleaners or cleansing milk (without any abrasive agents). Do not use abrasive cleaning sponges with scourers (such as scouring pads, etc.) or brushes, these can cause scratches if a lot of force is applied.

Refrain from using mechanical cleaning processes, e.g. with razor blades, knives or scrapers, etc. as this can cause scratches and damage the abrasion-resistant coating.

RAUVISIO crystal has an outstanding visual depth effect. The surface has a high-gloss or matt, scratch-resistant and abrasion-resistant coating, avoiding signs of normal domestic wear and tear as far as possible.

Best product experience

with the correct maintenance

In the event of improper use, e.g. if the hobs are not covered or are not fully covered for long periods when switched on or if there is direct contact with hot pots and pans, etc., the surface can incur temperature damage.

Proper and improper use
