

REHAU - PARTNER TO THE AUTOMOTIVE SUPPLIERS

SYSTEM SOLUTIONS FOR DEMANDING APPLICATIONS

AUTOMOTIVE SUPPLIERS

SYSTEM SOLUTIONS FOR DEMANDING APPLICATIONS

As the leading provider of polymer-based solutions in the automotive area, REHAU systematically creates design, comfort and safety added value. In addition to being a supplier to well-known vehicle manufacturers for the exterior, sealing, water and air management segments, REHAU is also a competent partner to the automotive supplier industry, with a broad range of innovative and tailored system solutions.

At the same time, our strong performance is not just based on the production of semi-finished and complete pre-assembled systems. We also assist our clients with technological competence that extends across industries, and comprehensive service for all stages of the production process. Using extrusion, injection molding and extrusion blow molding processes, REHAU processes all current thermoplastic materials into intelligent solutions for passenger cars and trucks, as well as omnibuses and agricultural equipment and small machinery. We focus on solutions that produce reductions in weight, are installation-friendly, offer a long service life and reduce the stress on the environment.

PROFILE FOR BOX BODIES

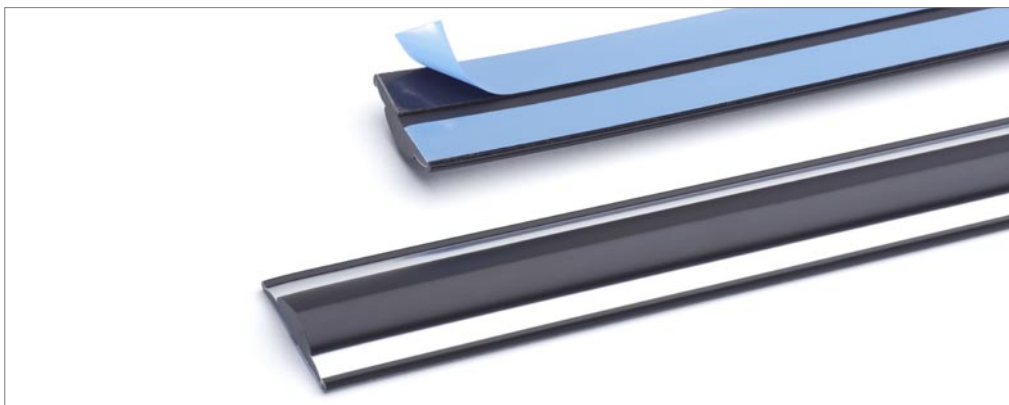

Cooling box bodies face particularly demanding requirements with regard to temperature resistance, long service life and weight reductions. REHAU's seals, finishers and retainers meet these requirements. Their reliable sealing properties contribute to ensuring that goods arrive at their destination in a well-cooled state, without incurring energy losses and additional fuel consumption.

INTERIOR/EXTERIOR

FOR COMMERCIAL VEHICLES

The interior commercial vehicle segment includes e.g. profiles for cable feedthroughs and also storage boxes in the vehicle cabin, in which tools or documents can be safely stored. With regard to the exterior of commercial vehicles, REHAU develops, manufactures and supplies products such as trims, body side moldings and drip moldings which can be attached using a number of different methods, such as adhesive tape or clips. Cover profiles and seals round off the exterior product range.

INTERIOR FOR BUSES

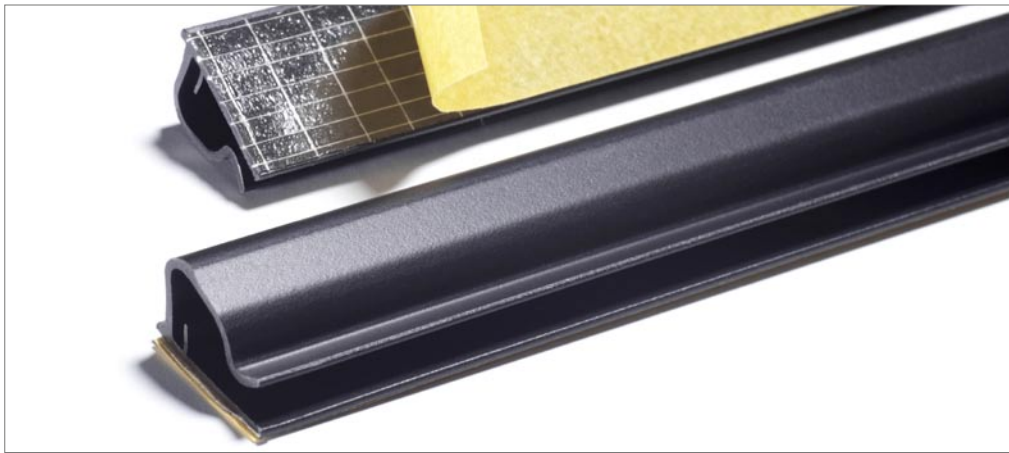

The interior program for buses includes cover, sill and angle profiles, as well as REHAU assist straps. Because of their fabric lining, these products offer good stability, are easy to clean and are available in customized colors.

INTERIOR/EXTERIOR

FOR PASSENGER CARS

In addition to beadings, REHAU also supplies cable management profiles for the roof lining area, as well as profiles for roll bars in convertibles. As a reliable specialist for integrated passenger car exteriors, we assist the automotive supplier industry with decorative, functional and service-oriented solutions, such as profiles and moldings for power sunroofs and panoramic roofs, roof ditch moldings, filler strips and also inserts.

PROFILES FOR RAIL VEHICLES

Whether train, rapid-transit or subway systems - proven REHAU quality and products such as seals, clamping strips and cover profiles provide safety and comfort for rail vehicles.

RESERVOIRS FOR SMALL MACHINERY AND COMMERCIAL VEHICLES

Based on its long-standing competence in the production of blow moldings, REHAU manufactures fuel reservoirs for construction machinery, oil reservoirs for motor saws, fuel tanks for light mopeds, back pockets for combine seats, as well as washer reservoirs. If required, we can also mount the required components and reservoirs together into comprehensive all-in-one systems.

OTHER PROFILES / MOLDINGS

Some of the special applications from the REHAU program of profiles and moldings include footboard coverings, transport protective profiles for pallets, valve key feeds, stone deflectors and dampening profiles. They all share one common attribute - comprehensive REHAU know-how.
