# RAUKANTEX wood

Truly natural

The best match for a real wood board is real wood veneer edges. The original feel, the natural look and the light smell of wood are convincing all along the line. As a natural material, every metre has its own distinct character. Every tree and thus every piece of wood is unique. Real wood veneers create a warm and inviting atmosphere of well-being and a piece of nature in every home.

## End grain wood edges – particularly genuine

As a particularly attractive veneer edge, REHAU offers also the “End grain edge European oak” in the standard range. The appearance of end-grain edges corresponds to a log cut across the length. This means that decorative chipboard can hardly be distinguished from solid wood today.

## Advantages in processing

- Real wood feeling
- Natural look through knotholes and colour changes
- Can be processed with conventional edge banding machines with hot melt or dispersion adhesives
- Sanded ready for painting

## Free sample service

Choosing the right decor just got easier! Introducing our free RAUKANTEX sample service, order your desired edgeband sample today.
