

RAUKANTEX MIRROR GLOSS

THE ULTIMATE IN GLOSS EDGE BAND

The increasing demand for high-gloss surfaces in upmarket interior design, project features, design for office and living space is a trend that is set to continue. When creating high-gloss surfaces, it doesn't come down to gloss level alone. The high-gloss finish is influenced considerably by the neutrality in the surface. Only when both factors come together does the eye perceive a mirror effect. Both factors are the secret behind the success of the RAUKANTEX mirror gloss edgebands. Lacquer application with > 85 gloss level points and the unique smoothness of the ABS surface set the highest standards.

ADVANTAGES:

- Mirror gloss surface with a gloss level of > 85 points and an unequalled reflective quality
- Consistent surface finish appearance even after machining
- A wide and varied selection of uni colours, chosen to compliment current board and laminate designs

Connoisseurs know that REHAU is positioned at the top end of the high-gloss market with its mirror gloss edgeband. REHAU has now included the dimension 45 x 1.3 mm for wide, horizontal applications in the kitchen and bistro setting.
