Exelis 190 System

The sophisticated multi-chamber design of the Exelis 190 window, combined with glazing up to 19 mm, allows for 40% better thermal insulation compared to aluminum. With the Exelis 190 system, single hung, single sliding and fixed configurations are possible. The system is available in white, beige, clay and is also available foiled in Blackbrown.

1 3 - 6 mm and 16 - 19 mm glazing capabilities

Provide excellent acoustical and energy performance properties to meet current standards with single or double glass

2 Welded frame and sash corners

Provides structural durability and reduced air, dust and water infiltration

3 Main profiles engineered with multiple chambers

Increase strength, energy performance and allow efficient water drainage

4 68.6 mm frame depth

Allows the system to be used in new construction and replacement applications

5 Direct crossbar to frame

Provides greater rigidity and allows for multiple configurations
