Enhancing lives**

NEA SMART 2.0

Energy-saving. Convenient. Stylish

#expectmore

NEA SMART 2.0: The smart room thermostat

Modern technologies help make our lives easier and more enjoyable. What if this also applied to your heating system and you were able to change any room temperature in your home, when you want to? The right temperature makes you feel comfortable at home.

Meet the NEA SMART 2.0: the room thermostat you can **#expectmore** from.

Design

The high quality and elegant design of NEA SMART 2.0 is available in two attractive colours: a subtle white or eye-catching black.

Virtual assistance

NEA SMART 2.0 can be part of your Smart Home system, linking with Amazon Alexa, you can control your temperature at home with your voice.

Geofencing

By activating a virtual fence around your home, your heating will automatically change to ensure your home is at the right temperature and at the same time saving energy.

Within your virtual fence, NEA SMART 2.0 will ensure your home is at the right temperature.

If you go outside your virtual fence, NEA SMART 2.0 will automatically lower the temperature and save energy.

Wired and wireless technology in one control

The central base station combines both options offering flexibility and allows for mixed installations.
