REHAU Global

A global leader in polymer processing technologies

When Helmut Wagner founded the company in 1948 with just 2 employees, he illuminated the way forward with the principles of competence, passion and innovation. Today, REHAU is an independent and family owned company that has over 20,000 employees across 50 countries. In every part of the world, the brand is redefining the interaction between our products and customers by engineering progress that enhances lives.

For the past 70 years, the ambition to enhance the lives of people around the world through innovative polymer-based solutions, along with the lessons from our predecessors, have been the driving force behind REHAU's success. Through our vigorous zeal and relentless efforts, we redefine what is possible in construction, automotive and industry, each day.

Today, insightful knowledge of the market and materials, complemented by tremendous experience in technology and manufacturing processes, allows us to cater to wide-ranging needs with customised solutions. This includes improving road safety, enhancing the aesthetic appeal of homes, reducing energy consumption in buildings, etc. As a family-run business, we think and act with a view to future generations – keeping with the principle of sustainability. By remaining focused on the growing importance of quality, efficiency and sustainability, we will continue our odyssey to make lives safer, healthier and more efficient across the world.

REHAU India

India footprints

REHAU commenced operations in India in 1997, by establishing a local manufacturing unit in Pune district of Maharashtra to cater for local industry market. Since then, it has established 3 plants and employed 600+ aspirants across the nation.

A German-based company dedicated to beautify and enrich homes with innovative solutions, REHAU prioritises and delivers superior solutions from product design to applications while providing great variety in terms of choices.

With more than 1000 direct customers and up to 2500 retailers, REHAU has exceeded expectations by establishing an enormous client base in India. With 3 offices and 2 experience centres spread across the country, 6 warehouses and a huge sales network, REHAU in India has become a polymer leader by rapidly capturing the market and managing its operations.

REHAU offers a choice of wide range of products which allows one to live with premium quality, thereby, raising the standard of living. These choices are versatile enough to accommodate new changes and that too with convenience. REHAU ensures that a positive difference is made through quality, innovation and choice.

Let's live with quality!

Engineering progress Enhancing lives

A promise of enhanced living built upon 3 pillars:

Trust

With synergism in effort, and trust in each member of the REHAU network, we make the impossible happen.

Innovation

Our strength is derived from innovative ideas that improves the ordinary for extraordinary results and performance.

Reliability

Our adherence for ethical guidelines is the foundation of our corporate conduct, because our vision is a better today and a great future, making us a reliable partner.

Surface Solutions for Enhanced Living

Acrylic Laminates

The premium range of Acrylic Laminates under RAUVISIO emphasise the latest trends in furniture and living space design. The versatile surface of RAUVISIO Crystal, Ace and Brilliant can be cut to size using standard woodworking tools, giving users total design freedom.

Pre-laminated Boards

A perfect fit for an ideal ambience, the collection of Pre-laminated Boards by REHAU - RAUVISIO Crystal Décor, Crystal, Brilliant and Radiant - highlight the luxurious and elegant factor of any household or office. From high-gloss to matt, available in a wide range of colours to facilitate any interior needs.

Flooring Solutions

Other than being a luxurious flooring for a convenient and comfortable experience, RAUFLOOR Crescendo Vinyl Flooring by REHAU is also an eco-friendly, water-resistant and highly durable solution for residential, light commercial and office applications. We also have the RAUFLOOR Crescendo Plank and Neostein, which have numerous advantages and a wide range of colours in EIR (embossed in registered) finish, making them the ideal flooring solutions for your interiors.

Solid Surface

The Solid Surface consists of non-porous artificial stones, which need minimal maintenance. This is why it is trending as a popular product for application in kitchen, bathroom, office, hotel, laboratories and medical facilities. RAUVISIO Mineral and Mono are converting ideas into reality, giving designers all the liberty to fulfil customised requirements. The Solid Surface is durable, easy to clean and has an elegant appearance with a warm touch.

RAUVISIO Crystal Laminates

The most flexible glass of all times

Glass lends a sense of elegance and luxury to kitchens, bathrooms and living rooms. An innovative surface material, RAUVISIO Crystal fully lives up to this trend and offers maximum design flexibility. RAUVISIO Crystal is a polymer glass that offers a high-quality glass finish while completely eliminating the disadvantages of real glass. Looking just as beautiful as real glass, RAUVISIO Crystal is 10x break-proof, scratch-resistant, 50% lighter than real glass and also offers excellent processing flexibility.

super matt**

Product Range

Individual components

Glass laminate and balancing sheet

High-gloss & matt

The glass laminate and balancing sheet, each 2mm, is perfectly colour-coordinated and ensure a distortion-free pressed board.

Dimensions

High gloss laminates	2440 x 1220 x 2mm
Matt	2440 x 1220 x 2mm
Balancing sheet	2440 x 1220 x 2mm

Edgeband collection

High-gloss & matt

For RAUVISIO Crystal, we offer perfectly coordinated edgeband designs.

Product Advantages

Easy processing

Whether it's customisation, dimensionally accurate pre-cuts or holes for handles and fittings - you can easily process RAUVISIO Crystal using pre-existing wood working tools, without the risk of breaking it or producing any rejects. Even bends and free-form parts can be created without problems.

Grooves and inlays

Thanks to grooves and inlays, RAUVISIO Crystal offers even more design flexibility.

Product Advantages

Back lighting

The rear grooves are ideal for back lighting using conventional lights. This will allow you to add even more highlights.

Break and scratch-resistant

RAUVISIO Crystal is break-resistant and is therefore suitable for large-scale industrial production. Its shock and break resistance result in 20% fewer rejects. The material is also as scratch-resistant as real glass and therefore highly desirable - even for end customers.

Easy to write and erase

On glossy RAUVISIO Crystal laminates, it is possible to write with conventional board markers, which can be easily erased without leaving any residues. Chalks can be used on matt surfaces.

Easy to clean

The non-porous surface is sealed with a hard coat finish, and can therefore be cleaned without problems. RAUVISIO Crystal is also suitable for use in rooms with the highest hygiene requirements.

RAUVISIO Brilliant Laminates

Acrylic surfaces for interior designing

RAUVISIO Brilliant represents our latest generation of high-gloss laminates. Thanks to its vibrant depth effect, it can replace high-quality painted elements. The high-gloss laminates consist of a PMMA and ABS layer and guarantee a high-tensioning force with a positive effect on surface stability after processing. RAUVISIO Brilliant exhibits excellent lightfastness and UV resistance. There is no colour fading, regardless of natural or artificial exposure to light when used for interior applications.

The balancing sheet developed in-house is perfectly colour-coordinated to RAUVISIO Brilliant and has sufficient freedom from distortion for the pressed board.

**Now
available
in 1mm
thickness**

Product Advantages

Sawing and drilling

RAUVISIO Brilliant can also be processed with conventional wood working tools to make – individual, dimensionally accurate pre-cuts, holes for handles or fittings.

Bending and folding

RAUVISIO Brilliant is ideal for simple bending and folding. It can be shaped into nearly any form and thus provides a lot of design freedom for sophisticated furniture designs.

High gloss on the milling radius

Combined with polymer zero-joint edgeband and new processing technologies, conventional frame effect disappears completely with RAUVISIO Brilliant. The result is a perfect, all-round gloss on the entire work-piece.

UV resistance

RAUVISIO Brilliant has excellent lightfastness and UV resistance. So there are no colour variations between different light and sun exposures in interior applications.

RAUVISIO Brilliant SR Pre-laminated Board

Scratch-resistant and seamless acrylic finish

Customisation in interior designs is in trend. Whether you want a high gloss depth effect or matt elegance, RAUVISIO Brilliant SR will help you get an exclusive surface with an ultra-durable hard coat finish. The material has a captivating lacquer with exceptional resistance to scratches and chemicals.

**High
scratch
resistance**

Multitude of Variants

RAUVISIO Brilliant SR Board with matt and high-gloss

Engineered with innovative German Technology, RAUVISIO Brilliant Pre-laminated Boards cater to diverse industry requirements. It is easy to clean and maintain its regular look. Its seamless finish can replace even high-quality painted elements; the contemporary features make it the right solution for every ambience.

High scratch resistance due to its hard coat finish

Totally seamless appearance and therefore an inexpensive alternative to real lacquered fronts

Soft-to-touch super matt finish

Up to 60% lower production costs compared to lacquered components

Easy cleaning thanks to nanotechnology

Hygienic & Safe

Can be written on with a whiteboard marker (high-gloss) or chalk (matt) and cleaned without leaving any residue

Colour and UV- stable

Can be processed with conventional wood working tools

Product advantages and technical specifications

High scratch-resistance

Lacquer equips RAUVISIO Brilliant SR to resist scratches making it suitable for requisite applications.

Easy cleaning

The non-porous surface is sealed with a hard-coat finish, making it easy to clean. RAUVISIO Brilliant SR is also suitable for use in rooms with the highest hygiene requirements.

Technical features

- Tested according to DIN 68861/T4
- Scratch-resistant - 4B
- Same colour balancing sheet, symmetric in order to prevent deformation
- Gloss level of <6, measured in conformity with AMK-MB-009 (09/2010)

Tested for resistance under temperature gradient

- 1 hour 50 ° C
- 1 hour 60 ° C
- 4 hour 75 ° C

{Assessed according to AMK-MB-001 (05/03)}

Tested for resistance under moisture gradient

- 14 day permanent storage
- 85 ± 5% rel. air humidity
- 40 ± 2 ° C test temperature

{Assessed according to AMK-MB-005 (07/2007), module2}

RAUFLOOR Neostein

Rigid core vinyl tile

RAUFLOOR Neostein is an epitome of REHAU's innovation. The plank comprises of Stone Plastic Composite (SPC) and is characterised by five special layers: UV layer, wear layer, colour film/printed layer/ vinyl top coat, an SPC core and a foam or cork backing layer. The top most UV layer protects the surface from most scratches, dirt, chemical contaminants and offers resistance to abrasion. The wear layer gives it durability, stain and scratch resistance which helps in easy cleaning, while the printed layer provides the desired pattern to the surface. The ultra-dense SPC core makes it water proof and durable and the foam or cork backing helps in the installation process by smoothing out minor imperfections in the subfloor.

RAUVOLET Vetro Line 2.0

Premium glass roller shutter system

Word's first 'plug and play' glass roller shutter system

RAUVOLET Vetro Line 2.0 offers a unique way of bringing together two previously incompatible solutions - simple installation with convenient functional characteristics of tried and tested RAUVOLET cassette system, and the design features of genuine glass. This ready-to-install cassette module just needs to be screwed into the cabinet.

**30%
space
saving**

Advantages

- Space saving up to 30% compared to regular swing doors - the roller shutter can be left open at any desired height for convenient 100% access.
- The excellent gliding properties offer smooth and quiet opening and closure of the cabinet. The roller shutter is designed to withstand heat, steam and water in the kitchen. While steam and water can cause regular swing doors to swell and eventually show cracks and bulges, RAUVOLET stays as new for years.

RAUVOLET Crystal Line 2.0

Smart glass in a tambour door

Whether you desire ample storage space or a much more modern look for your interiors, RAUVOLET Crystal Line 2.0 offers you the best of both worlds. With the sophisticated look and design of glass as well as the improved strength, better scratch resistance and lighter weight of a polymer, it is expertly crafted to suit the modern interior designs, be it for kitchen, living room or a shop fit-out.

Advantages

- Aesthetic appeal of real glass with the benefits of a polymer door system.
- Designed to match current RAUVISIO Crystal colours.
- Accessory set available in 3 colours.
- Simple installation using 'Plug & Play' system.
- Available in High Gloss & Matt finish.

RAUVOLET Metallic Line Frame 4

Delicate roller shutter system for stirring appearance

RAUVOLET Metallic Line Frame 4 offers a unique way of bringing together two previously incompatible solutions - simple installation with convenient functional characteristics of tried and tested RAUVOLET cassette system, and the design features of genuine glass. This ready-to-install cassette module just needs to be screwed into the cabinet.

RAUVOLET Metallic Line tambour door system makes exclusivity possible.

- High-quality, exclusive look
- High operating comfort
- Light, smooth running
- Pleasant feel

Advantages

- The new subtle design of the track system made from solid aluminium highlights the exclusive appearance of the RAUVOLET Metallic Line effectively - for the first time.
- Easy to install due to convenient cassette solution.
- Delicate track system and reduced accessories creates a sleek design.
- Combination of exclusive aluminium or stainless steel (SS) surfaces with the convenient, functional properties of polymer tambour door systems.

RAUKANTEX Mirror Gloss

The ultimate in gloss edgebands

The high demand for high-gloss surfaces in upmarket interior designs for office and living space is set to continue. When creating high-gloss surfaces, it doesn't come down to gloss level alone; the high-gloss finish is influenced considerably by the neutrality in the surface. The eye perceives a mirror effect only when both these factors resonate. Striking the perfect balance between the twin factors is the secret behind the success of the RAUKANTEX mirror gloss edgebands. Having a lacquer application with over 85 gloss level points and unique smoothness of the ABS surface, RAUKANTEX Mirror Gloss sets the highest standards

Material	ABS (without embossing)
Lacquer type	Mirror gloss
Size	23 x 1mm

Features

- The ultimate in gloss edgeband
- A gloss level of over 85 points and a pure, reflective quality, sets new standards for mirror surface effect
- Delivery with protective foil
- Goes mainly with Formica, Senosan
- Now includes the dimensions 45 x 1.3mm for wide-horizontal applications in kitchen and bistro
- Fresh colours and striking decorative designs are the newest additions to our collection

RAUKANTEX Magic 3D

The fascination of metal

REHAU can now add two distinctly different gloss finishes to one decorative design. By using two different lacquer types, we have successfully managed to produce unique effects creating a 3D illusion. Ingenuity of the new brushed titanium, foamed metal and rain decorative designs convince even the most discerning critics. The processing properties, however, have remained the same for all of the innovations: good radius compatibility, a finish that requires no reworking, radii that can be polished, and decorative designs that remain intact even when the radius is milled. These are matched to popular boards/laminates.

RAUKANTEX Magic 3D

72236 - Aluminium (Art. no. 309509-002)

Material	PMMA (Polymethyl methacrylate) with new decoration process
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23mm x 1.00mm

Material	PP (Polypropylene) with real aluminum or steel surface
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23mm x 1.00mm

Advantages

- Zero-hour adjustment time - no special adjustment required on machine parameters
- New perspectives in the creative edge design along with RAUVOLVET Roller Shutter
- Various combination of colours/décor and two different finishing on surface are possible
- Combinational design, metal foil and processing advantage of polymers
- Economical alternative for compact aluminum edge applications. There is no need for special adjustment on machine parameters

RAUKANTEX V-Groove

Glass and metal unite

REHAU's V-groove has a split design feature allowing high gloss and matt finish to be incorporated within one edgeband. By ensuring that the top section of the edgeband has an exact lacquer match to the surface being edged, the impression created is that the surface and the top section of the edgeband is all made from one piece, with the lower section of the edgeband having a contrasting matt finish. By cleverly incorporating two different levels of lacquers within one edgeband, the overall impression of a moulded surface is achieved, suggesting a surface created out of the same parent material. For worktops and counter applications, the new dimension in 45 x 1.3mm offers the perfect solution. The new super high gloss design is ideally matched to the glossy surfaces of board manufacturers. This creates the appearance of being one piece. Furthermore, there is of course the combination of glass and metal in order to create a stacked effect. Whilst the top of the edgeband is glass-coloured, the lower area is finished e.g., with a stainless steel or aluminium look.

Material	PMMA (Poly Methylmetha Acrylate)
Embossing	Smooth/223
Lacquer type	Standard lacquer
Size	23mm x 1.00mm

RAUKANTEX Super High Gloss

The impressive gloss

The world of high-gloss boards/laminates and the spectrum of corresponding gloss levels are vast. Based on the customer requirement and area of application, you can create a perfect surface with optimum gloss level. REHAU recognises these differences and, in response, also offers super-high-gloss finish, matched to corresponding boards and laminates in addition to the high-end mirror gloss surface.

Material	PVC and ABS
Lacquer type	Super high gloss lacquer
Size	23 x 1.30mm and 25 x 1.30mm

Advantages

- New super high gloss finish with gloss level of over 85 points with smooth and reflective surface.
- Designed for use in regular edgeband machine without the need for special settings.
- Comes with protective film to prevent scratches during processing or transportation.

RAUKANTEX Wood Veneer

Mesmerising wooden patterns

Wood has many varieties: walnut, maple, beech, ash, etc., each corresponding to a particular shade. This range in the natural variety of wood is also available in RAUKANTEX Wood Veneer edgebands.

During production, the veneers are sorted according to growth characteristics and appearance, so that within each batch the master rolls produced are of uniform colour. With its wide variety of wood types and thicknesses, the RAUKANTEX Wood Veneer edgeband range can provide a suitable match for every application.

Material	Wood veneer
Size	Thickness 0.60mm and 1.00mm
	Width 24mm, 35mm, 45mm and 55mm

Advantages

- Real wood veneer collection
- European wooden pattern
- Multi-layered with adhesive-coated sides
- Asymmetrical and finger joints

REHAU Zero-joint Edgeband

Elevate your design with zero-seams and zero glue

Zero-joint Edgeband is a revolutionary product from REHAU to help you achieve a seamless finish with no framing effect. The pre-applied, co-extruded polymer functional layer replaces the traditional glue, allowing for a much superior and seamless joint between the edgeband and the board.

Advantages

- Achieve visually beautiful monolithic panel look
- Best moisture resistance, heat resistance and performance over time
- Seamless joint and a higher quality seal
- Creates a bond equal to or greater than PUR (no delamination)
- Higher quality edging allows you to promote a higher-end finished product at a premium
- No hotmelt or down-line cleaning of excess adhesive from finished panels

Sustainability

While our quest is to achieve a seamless joint and superior finish with Zero-joint edgebanding, the ecology and conservation of resources are important for REHAU too. Thus, we are able to reduce the need for adhesives and cleaning agents during the procedure. We also use **ABS material** that is **ecological in nature** and **harmless to the health** of humans.

V-Twin

Dual tone to edgeband

A particular highlight within the V-Twin is the stepped edgeband with a groove. Whilst the upper section of the edgeband is available in typical glass colours, the lower section features aluminium. When combined with a surface of the same shade, this gives an appearance of a real glass-like top surface.

Material	ABS	Size	23 x 1.00mm
Lacquer type	Super lacquer		

Advantages

- Combination of the design aspect of glass with the processing advantages of polymers
- Special surface protection - 100% resistant to typical accidental scratches
- Various combination of colours/décor and two different finishes on surface is possible
- Zero-hour adjustment time - no special adjustment required on machine parameters
- New perspectives in the creative edge design along with RAUVOLVET roller shutter

RAUBOND Adhesives

RAUBOND Adhesives

Water-based adhesives for Retail

RAUBOND presents a range of water-based adhesives, comprising Champ, PolyMaster and Rapid-X. These adhesives are suited for various applications. Being a multi-purpose adhesive, RAUBOND Champ is perfect for manual pressing and laminating applications, including hot press and cold press. RAUBOND PolyMaster is ideally used for PVC edgebanding, along with pasting plywood to acrylic sheets, PVC sheets and charcoal sheets. With its fast setting application, RAUBOND Rapid-X is used in marine ply, marine laminate, finger jointing and laminating applications (hot press, cold press and roller press).
Packs available in (kg) : 1/2, 1, 2, 5 and 50

Applications

- PVC edgebanding
- Plywood to acrylic, PVC and charcoal sheets
- Wood to wood adhesive
- HPL to plywood
- Finger jointing
- Critical wood applications

Strong bonding

Water-based adhesives for OEM

RAUBOND also offers a range of water-based adhesives exclusively for OEMs: WudTite, WudTite Pro and Swift.

RAUBOND WudTite is a multipurpose adhesive that instantly bonds with surfaces.

RAUBOND Swift is a waterproof adhesive prepared with a termite resistant formula, ideal for applications requiring fast setting.

RAUBOND WudTite Pro is crafted with an anti-bubble formulation which makes it perfect for critical wood applications and vertical pasting.

|----------------------|------------------------|
| ■ Techpro Clear 6768 | ■ Techfix 544/15 |
| ■ Techpro 545/15 | ■ Techmanual Clear6765 |
| ■ Techpro 545/05 | ■ Techmanual 6722/15 |
| ■ Techplus 580/15 | ■ Techmanual 6723/15 |

Features

- Grades available for through-feed, semi-automatic and manual edgebanding machines
- Excellent melting properties
- Excellent adhesion for bonding PVC, wood veneer, PP and ABS
- No stringing
- European quality
- High thermal resistance
- Medium viscosity
- High green strength

Applications

To be used in manual and automatic bending machines for strong adhesion between the substrate and:

- Veneer
- Resinated paper edges
- PVC
- Polyester
- ABS
- Melamine resin edges and heart-wood

Shelf life: 2 years, in a properly closed package; to be stored in a cool and dry place.

Wood Working Accessories

Masking tape

REHAU Masking Tape

Superior quality adhesion

General purpose masking tape

The robust tape for everyday jobs, REHAU Masking Tape can be used on almost all surfaces and gets removed easily without leaving any residue. It can be used at all workplaces and job sites. REHAU Masking Tape is a cost-effective and pressure-sensitive product that holds and seals perfectly, providing superior quality adhesion for 14 hours.

Features

- Wide range of applications
- Masking, splicing, bundling and packaging
- Conforms to all surfaces
- No residue transfer on removal

Sizes available

Width	18mm and 24mm
Length	20m and 40m

Possible application areas:

Furniture

Hardware

Paints

Automotive

RAUCORD Weaving Materials

The new generation weaving material

RAUCORD

The new generation weaving material

If you love the luxurious appeal of wicker furniture but dread its upkeep, RAUCORD has come to your rescue. RAUCORD is a collection of high quality premium synthetic weaving material. With its superior characteristics and cutting-edge technology, RAUCORD offers you a relaxed and carefree experience both indoors and out.
