PURE Line uPVC Windows

PURE Line uPVC windows for
the affordable housing market in Africa.
Want to know more?

**Please contact your local REHAU
Authorized Partner**

Window with variable Re-Inforcing

With REHAU PURE Line windows you have the option to use either the Composite Re-Inforcing (for smaller windows up to 800mm x 800mm with single glazing) or Steel Re-Inforcing for the larger windows in order to increase the I Values of the windows.

The advantage for both the end user and fabricator is that the Composite and Steel reinforcing have the same shape for both the Frame and Sash profiles (opening profile). Less profiles to carry in stock = lower costs.

Internationally accepted, installed world-wide
REHAU windows are installed all over the world due to their durability and energy saving qualities. There is a suitable REHAU window for every application.

REHAU
Quality

The affordable solution for developers

The introduction of PURE Line offers a solution for developers who wish to combine economy with efficiency.

Designed in South Africa for the African market, this system increases the value of any home with its aesthetic good looks and durability.

Your local professional Authorised Partner is equipped to deal with contracts of any size to ensure that REHAU can now offer PURE Line country wide.

Glazing Options

REHAU PURE Line windows can be glazed with 4mm Single Glazed Glass to 18mm Double Glazed SIG (Sealed Insulated Glass) Units.

Coupling Options

PURE Line windows can be joined together for larger spans of windows in dormitories or factory / warehousing applications using specially designed couplers with and without steel. The PURE Line 36mm system can also be coupled to the Ecotec 60mm system allowing PURE Line windows to be coupled to Ecotec Doors and Sliding Doors.

PURE Line**

**Designed in
South Africa**

Energy Efficient

The PURE Line uPVC window will aid in reducing expenses for heating or cooling a home.

Low Maintenance

The PURE Line uPVC window will not warp, rot or need sanding, varnishing or painting. Dust can simply be wiped off using a soft cloth, warm water and dishwashing liquid.

Noise Reduction

Our uPVC window will keep more of the outside noise outside to ensure a calm and quiet living space, due to double sealing gaskets and glazing options.

Durable and Tough

Even in extreme temperatures with salt-laden, corrosive sea air, REHAU PURE Line will keep its good looks for many years. Durable and tough, PURE Line will outlast any non-uPVC window system.

UV Stable

PURE Line is manufactured using the specially designed RAU-PVC 1476 high weather formulation, making the profiles suitable for regions with high UV radiation.

The PURE Line uPVC window system is affordable, durable and energy efficient. PURE Line is the window for the affordable housing market across the African continent.
